## **Rationing Education Policy Practice Reform And Equity:**

*Rationing Education* Gillborn, David, Youdell, Deborah, 1999-12-01 This research should make us extremely sceptical that the constant search for higher standards and for ever increasing achievement scores can do much more than put in place seemingly neutral devices for restratification Michael W Apple John Bascom Professor of Curriculum and Instruction and Educational Policy Studies University of Wisconsin Madison Recent educational reforms have raised standards of achievement but have also resulted in growing inequalities based on race and social class School by school league tables play a central role in the reforms These have created an A to C economy where schools and teachers are judged on the proportion of students attaining five or more grades at levels A to C To satisfy these demands schools are embracing new and ever more selective attempts to identify ability Their assumptions and practices embody a new IQism a simple narrow and regressive ideology of intelligence that labels working class and minority students as likely failures and justifies rationing provision to support those often white middle class boys already marked for success This book reports detailed research in two secondary schools showing the real costs of reform in terms of the pressures on teachers and the rationing of educational opportunity It will be important reading for any teacher researcher or policymaker with an interest in equality in education **Politics,**

Political Subjectivities in Neoliberal Times and Places Eva Reimers, Lena Martinsson, 2016-10-04 *Education and Political Subjectivities in Neoliberal Times and Places* investigates the conditions and possibilities for political subjectivities to emerge in international educational contexts where neoliberal norms are repeated performed and transformed Through demonstrating the possibility of political subjectivities this book argues that neoliberalism should neither be considered post

political nor a natural law by which educational practices have to abide This book considers how political subjectivities are made possible in education in spite of dominant neoliberal norms Chapters address key theoretical discussions surrounding these different sometimes contradicting norms and their relationship to education economy and politics This innovative approach considers diverse educational and political initiatives in the wake of new public management postcolonial perspectives on neoliberal education and educational practices and critical possibilities The book advocates understanding and enacting democracy as an experiment based on the conception that democracy is constantly constructed and constitutes a transformative process in society in general as well as in education This book advances the argument that there is still room for political subjectivity in spite of the dominance of neoliberal educational governance It will appeal to researchers academics and postgraduate students in the fields of higher education education policy and politics sociology of education and comparative and international education as well as those interested in neoliberalism new public management and inequality

*Demythologizing Educational Reforms* Arthur T. Costigan, Leslee Grey, 2014-08-21 There are dozens of myths surrounding educational reform today maintaining the school's role in economic competitiveness the deficiency of teachers the benefits of increased testing and the worthiness of privatization In this volume the editors argue that this discussion has been co-opted to reflect the values and worldviews of special interest groups such as elites in power politicians corporate educational foundations and the media Prominent educational writers tackle contemporary issues such as neoliberalism suburban schooling charter schools and parental involvement They expose the logic behind the talk and critically examine these problematic beliefs to uncover meaningful improvements in education which are better grounded in the social economic political and educational realities of contemporary society

**Critical Theories, Radical Pedagogies, and Global Conflicts** Gustavo Fischman, 2005 We are living in a time of resurgent global conflicts and imperialistic tensions a time in which many children are being left behind by school systems that appear more concerned with developing accountability schemes and standardized models of testing than with defending the right of every child to have access to a good education The efforts of countless teachers activists and families working and living in poor areas around the world are labeled as failures entirely discredited on the basis of their expendability in relation to capital gains or simply ignored In response to these oppressive and challenging conditions this book's contributors a group of committed educators and activists working in an ethos of solidarity across geopolitical and geographical borders have advanced arguments and strategies that link educational transformation to the larger struggle to transform oppressive social relations In a clear attempt to move beyond both nostalgia and romanticism *Critical Theories Radical Pedagogies and Global Conflicts* draws from a range of viewpoints conceptual and thematic transnational and crosscultural First World and Third World to articulate new directions for teachers and activists working to demonstrate that another education and indeed another world is possible

Who defines its principles How should these principles be taught and by whom And by what authority shall they be grounded These types of thorny questions occupy the essence of educators and the authors of this book This book is about teachers educators and topics related to inclusion Teachers and educators have a lot to know therefore the topics are broad and relevant to the times What should teachers know about special needs religion and spirituality Aboriginality the environment tolerance and school choice Although teachers have knowledge of their subject matter knowledge alone is not sufficient They must know and understand how people learn A teacher must also care deeply about who they teach And this teacher knowledge grows and changes over time as teachers become more experienced informed skilled and wiser At the same time no teacher preparation will be sufficient because there will always be discussions that were never had and knowledge that was never shared Time has its costs and there is only so much a formal education can prepare someone This book helps to satisfy a cavity in learning for teachers and educators in general
