**Concrete Semantics** Tobias Nipkow, Gerwin Klein, 2014-12-03 Part I of this book is a practical introduction to working with the Isabelle proof assistant It teaches you how to write functional programs and inductive definitions and how to prove properties about them in Isabelle's structured proof language Part II is an introduction to the semantics of imperative languages with an emphasis on applications like compilers and program analysers The distinguishing feature is that all the mathematics has been formalised in Isabelle and much of it is executable Part I focusses on the details of proofs in Isabelle Part II can be read even without familiarity with Isabelle's proof language all proofs are described in detail but informally The book teaches the reader the art of precise logical reasoning and the practical use of a proof assistant as a surgical tool for formal proofs about computer science artefacts In this sense it represents a formal approach to computer science not just semantics The Isabelle formalisation including the proofs and accompanying slides are freely available online and the book is suitable for graduate students advanced undergraduate students and researchers in theoretical computer science and logic

**Software Safety and Security** Tobias Nipkow, Orna Grumberg, 2012-05-15 Recent decades have seen major advances in methods and tools for checking the safety and security of software systems Automatic tools can now detect security flaws not only in programs of the order of a million lines of code but also in high level protocol descriptions There has also been something of a breakthrough in the area of operating system verification This book presents the lectures from the NATO Advanced Study Institute on Tools for Analysis and Verification of Software Safety and Security a summer school held at Bayrischzell Germany in 2011 This Advanced Study Institute was divided into three integrated modules Foundations of Safety and

ist polynomialzeit äquivalent zum L-Sen von Paritätsspielen einem 2-Spieler-Spiel auf beschrifteten gerichteten Graphen. Wir präsentieren die ersten FPT-Algorithmen für das Model Checking Problem des modalen Kalküls auf Klassen von Graphen mit beschränkter Kelly-Weite oder beschränkter DAG-Weite. Für diesen Zweck beweisen wir einen allgemeineren Zerlegungssatz für den modalen Kalkül und stellen eine natürliche Definition von Typen für diese Logik vor. Angenommen eine Klasse von Paritätsspielen hat einen Polynomialzeit Lösealgorithmus, betrachten wir danach das Problem diese Klassen zu erweitern auf eine Weise, sodass Polynomialzeit Lösbarkeit erhalten bleibt. Wir zeigen, dass dies beim Join von Paritätsspielen, beim Pasting und beim Hinzufügen einzelner Knoten der Fall ist. Wir folgern daraus, dass das L-Sen von Paritätsspielen in Polynomialzeit möglich ist, falls der unterliegende ungerichtete Graph ein Tournament, ein vollständiger bipartiter Graph oder ein Blockgraph ist. Im letzten Kapitel präsentieren wir den ersten nicht-trivialen formalen Beweis über Paritätsspiele. Wir stellen einen formalen Beweis für die positionale Determiniertheit von Paritätsspielen im Beweis.

**Attention Spans** Garrett Stewart, 2024-01-25 *Attention Spans* chronological review of Garrett Stewart's critical approach tracks and maps the evolution of intersecting disciplines from late New Criticism through structuralism, deconstruction, narrative theory, by way of narratology, poetics and media studies in which Stewart's has been so persistent and so eloquent a voice. Excerpts from his twenty books are framed by editorial retrospect then linked by Stewart's own commentary on the variety and underlying vectors of his interpretive career across aesthetic forms from Victorian narrative to recent American fiction, classic celluloid cinema to postfilmic digital effects, inert book sculpture and literary wordplay to the soundscape of singing on screen. Accompanied by a glossary of his many influential coinages, this cornucopia of analyses is also a chronicle of evolving paradigms in the work of intensive reading.

*Daughter of Heaven* Leslie Li, 2011-12-03 In this powerful, touching memoir of a critically acclaimed Chinese American writer, taste becomes the keeper of memory and food the keeper of culture when Nai nai, her extraordinary grandmother, arrives from mainland China. Leslie Li's paternal grandfather, Li Zogren, was China's first democratically elected vice president to whom Chiang Kai-shek left control of the country when he fled to Formosa in 1949. Nine years later, Li's wife, Nai nai, comes to live with her son's family in New York City, bringing a whole new world of sights, smells, and tastes as she quickly takes control of the kitchen. Nai nai's tantalizingly exotic cooking opens up the heart and mind of her American granddaughter to her Chinese heritage and to the world. Through her grandmother's traditional cuisine, Leslie bridges the cultural divide in an America in which she is a minority, as well as the growing gap at home between her rigid traditional Chinese father and her progressive American-born mother. Interspersed throughout her intimate and moving memoir are the author's personal recipes, most from Nai nai's kitchen, that add a delicious dimension to the work. A loving ode to family and food, *Daughter of Heaven* is an exquisite blend of memory, history, and the senses.

**Evidence Law Adrift** Mirjan R. Damaska, 1997-01-01 In this important book, a distinguished legal scholar examines how the legal culture and institutions in Anglo-American countries affect the way in

which evidence is gathered sifted and presented to the courts Mirjan Damaska focuses on the significance of the divided tribunal between judge and jury the concentrated character of trials day in court justice and the prominent role of the parties in adjudication the adversary system Throughout he contrasts the Anglo American system with Continental or civil law justice where lay fact finders sit with professional judges in unified tribunals proceedings are episodic rather than concentrated and the parties have fewer responsibilities than in the common law tradition Damaska describes the impact of the traditional institutional environment on the gathering and handling of evidence in common law jurisdictions and then explores recent transformations of this environment trial by jury has dramatically declined pretrial proceedings have greatly proliferated the adversary system shows signs of weakening in some types of cases As a result many rules and practices supporting the treatment of evidentiary material are in danger of becoming extinct In addition says Damaska the increasing use of scientific methods of inquiry could place further strains on the use of traditional common law evidence In the future we should expect greater variety in decisionmaking activity with factual inquiries tailored to the specific type of proceeding and common law evidence restricted to a narrow sphere
