Re Thinking Aesthetics Rogue Essays On Aesthetics And The Arts:

Re-thinking Aesthetics Arnold Berleant, 2017-03-02 The essays collected by Berleant in this volume all express the impulse to reject the received wisdom of modern aesthetics that art demands a mode of experience sharply different from others and unique to the aesthetic situation and that the identity of the aesthetic lies in keeping it distinct from other kinds of human experience such as the moral the practical and the social Berleant shows on the contrary that the value the insight the force of art and the aesthetic are all enhanced and enlarged by recognizing their social and human role and that this recognition contributes both to the significance of art and to its humanizing influence on what we like to call civilization

Aesthetics beyond the Arts Arnold Berleant, 2016-03-23 Taking the view that aesthetics is a study grounded in perception the essays in this volume exhibit many sides of the perceptual complex that is the aesthetic field and develop them in different ways They reinvigorate our understanding of such arts as music and architecture they range across the natural landscape to the urban one they reassess the place of beauty in the modern environment and reassess the significance of the contributions to aesthetic theory of Kant and Dewey and they broach the kinds of meanings and larger understanding that aesthetic engagement with the human environment can offer Written over the past decade these original and innovative essays lead to a fresh encounter with the possibilities of aesthetic experience one which has constantly evolved moving in recent years in the direction of what Berleant terms social aesthetics which enhances human environmental integration and sociality

The Social Aesthetics of Human Environments Arnold Berleant, 2023-08-24 Across these essays Arnold Berleant demonstrates how aesthetic values and theory can be used to reappraise our social practices He tackles issues within the built environment everyday life and politics breaking down the dichotomy between the natural and the human His work represents a fresh approach to traditional philosophical questions in not only ethics but in metaphysics truth meaning psychology phenomenology and social and moral philosophy Topics covered include the cultural aesthetics of environment ecological aesthetics the aesthetics of terrorism and the subversion of beauty The corruption of taste by the forces of commercial interests as well as how aesthetics can advance our understanding of violence are also considered Berleant's exploration is supported by his analysis of 19th century art to the present day starting with impressionism through to postmodernism and contemporary artistic interventions By critically examining the field in this way and casting new light on social understanding and practice this collection makes a substantive contribution in identifying and clarifying central human issues guided by an understanding of aesthetic engagement as a powerful tool for social critique

Aesthetics without Objects and Subjects Nicola Perullo, 2025-02-06 Is there a connection between the environmental climate and political crises facing us today and Western dualism By critically examining the subject object dualism that has supported Western philosophy and aesthetics since the 17th century Nicola Perullo presents a relational and co operative account of aesthetic experience and human existence Exploring science ontology and aesthetics through the perspectives of quantum physics

relational interpretation and non dualistic philosophies Perullo draws on Western theories in anthropology and cultural traditions such as Buddhism and Daoism We see how the ontology supported by dualism renders the world to consist of static solid and discrete things making them vulnerable to be controlled dominated and possessed In Perullo s ground breaking analysis an alternative way of perceiving is offered the haptic modality which is guided by cooperation communication and correspondence Such a mode of perception and experience is ecological precluding the possibility of domination hierarchy and exploitation This challenge to the ramifications of the subject object model the very cornerstone of Western thought is an exciting invitation to rethink the purpose of philosophizing and its impact on life Thinking Through Poetry Marjorie

Levinson, 2018-07-04 Thinking through Poetry Field Reports on Romantic Lyric pursues two goals The title signals the contribution to debates about reading Do we think through by means of with poems sympathetically elaborating their surfaces Is this compatible with a second meaning thinking through poems to their end solving a problem getting to its root its deep truth Third can we square these surface and depth readings with a speculative philosophical criticism to which the poem carries us where through denotes a going beyond All three meanings of through are in play throughout The subtitle applies field first to Romantic studies since the 1980s a field that this project reflects upon from beginning to end Examples are drawn especially from Wordsworth but also from Coleridge and in assessing Romanticism s afterlife from Stevens Field also characterizes the shift from a unitary to a field concept of form during that time span a shift pursued through prolonged engagement with Spinoza Field thus underscores the synthesis of form and history the importance of analytic scale to that synthesis and the displacement of entity text by relation as the object of investigation While the book historically connects early nineteenth century intellectual trends to twentieth and twenty first century scientific revolutions its focuses on introducing new models to literary criticism Unlike accounts of the influence of science on literature or various literature X approaches literature and ecology literature and cognitive science it constructs its object of inquiry in a way cognate with work in non humanities disciplines thus highlighting a certain unity to human knowledge The claim is that specialists in literature should think the way distinguished scientists think and vice versa *Art Rethought* Nicholas

Wolterstorff, 2015-09-10 Human beings engage works of the arts in many different ways they sing songs while working they kiss icons they create and dedicate memorials Yet almost all philosophers of art of the modern period have ignored this variety and focused entirely on just one mode of engagement namely disinterested attention In the first part of the book Nicholas Wolterstorff asks why philosophers have concentrated on just this one mode of engagement The answer he proposes is that almost all philosophers have accepted what the author calls the grand narrative concerning art in the modern world It is generally agreed that in the early modern period members of the middle class in Western Europe increasingly engaged works of the arts as objects of disinterested attention The grand narrative claims that this change represented the arts coming into their own and that works of art so engaged are socially other and transcendent Wolterstorff

argues that the grand narrative has to be rejected as not fitting the facts Wolterstorff then offers an alternative framework for thinking about the arts Central to the alternative framework that he proposes are the idea of the arts as social practices and the idea of works of the arts as having different meaning in different practices He goes on to use this framework to analyse in some detail five distinct social practices of art and the meaning that works have within those practices the practice of memorial art of art for veneration of social protest art of works songs and of recent art reflexive art **Exploring**

Philosophical Essays on Ugo Nespolo's Art and Cinema Daniela Angelucci, Davide Dal Sasso, 2019-04-03 An indefatigable experimenter with new creative possibilities With his work the Italian artist Ugo Nespolo 1941 has given shape to a poetics that stands out in the contemporary art scene by existing on the border between avant garde and pop He has experimented in almost every field of art in and out of different screens from paintings to installations and cinema This book is a collection of philosophical essays that analyse Nespolo s poetics from different theoretical perspectives focused in particular on his artworks and films The book consists of three sections The first includes essays dedicated to Nespolo s works that fall within the visual arts The second presents contributions that investigate his cinema and some of his films The third section concludes the book with two interviews conducted at different stages of Nespolo s career which tackle some of the key themes of his poetics offering a direct insight into his theoretical reflection *Environmental Aesthetics* Martin Drenthen, Jozef Keulartz, 2014-02-03 Environmental aesthetics crosses several commonly recognized divides between analytic and continental philosophy Eastern and Western traditions universalizing and historicizing approaches and theoretical and practical concerns This volume sets out to show how these perspectives can be brought into conversation with one another The first part surveys the development of the field and discusses some important future directions The second part explains how widening the scope of environmental aesthetics demands a continual rethinking of the relationship between aesthetics and other fields How does environmental aesthetics relate to ethics Does aesthetic appreciation of the environment entail an attitude of respect What is the relationship between the theory and practice The third part is devoted to the relationship between the aesthetics of nature and the aesthetics of art Can art help save the Earth The final part illustrates the emergence of practical applications from theoretical studies by focusing on concrete case studies *Embodied Aesthetics in Drama Education* Matthew DeCoursey, 2018-12-13 If it is a good thing to use drama for education there must be something specific about drama that makes it good for the purpose It has power of some kind it makes things meaningful that would

otherwise be meaningless or things memorable that would otherwise be forgettable Or perhaps it enables independent thought in an area that would otherwise become mere rote learning Many practitioners believe that drama has the power to develop learner autonomy or even to give learners power over their lives In the last twenty years a widespread view has developed that this something that creates the benefit of drama is aesthetics There are many views of aesthetics but what unites them is the special significance that art has for our lives This book is about the relation between aesthetics and education in the use of drama Within it philosophy appears as the essential connecting discipline between the practice of arts based education and our advancing knowledge of the interrelations of cognition emotion and embodiment Matthew DeCoursey argues that the power of dramatic art is to be found in its bodily emotional nature Drawing on recent work in the aesthetics of theatre he shows that much of the power of theatre can be attributed to a specific range of ideas and techniques notably including double meaning making aesthetic focus and dramatic tension Finally the author relates different forms of drama education to different educational results holding that the conventional improvised forms are neither superior nor inferior to scripted theatre but merely serve different purposes Among those educational results discussed are the emancipation sought both by Rancière and by many practitioners of applied theatre but also curricular areas including language education

Nature and Landscape Allen Carlson, 2009 The roots of environmental aesthetics reach back to the ideas of eighteenth century thinkers who found nature an ideal source of aesthetic experience Today having blossomed into a

significant subfield of aesthetics environmental aesthetics studies and encourages the appreciation of not just natural environments but also human made and human modified landscapes Nature and Landscape is an important introduction to this rapidly growing area of aesthetic understanding and appreciation Allen Carlson begins by tracing the development of the field's historical background and then surveys contemporary positions on the aesthetics of nature such as scientific cognitivism which holds that certain kinds of scientific knowledge are necessary for a full appreciation of natural environments Carlson next turns to environments that have been created or changed by humans and the dilemmas that are posed by the appreciation of such landscapes He examines how to aesthetically appreciate a variety of urban and rural landscapes and concludes with a discussion of whether there is in general a correct way to aesthetically experience the environment
