**Children's Literature** Barbara Stoodt,1996 **Parents Guide to Kindergarten Instruction** ,2001 **Thinking and Learning through Children's Literature** Miriam G. Martinez,Junko Yokota,Charles Temple,2017-04-18 Much of teachers attention these days is focused on having students read closely to ferret out the author s intended meaning and the devices used to convey that meaning But we cannot forget to guide students to have moving engagements with literature because they need to make strong personal connections to books of merit if they are to become the next generation of readers literate people with awareness of and concern for the diversity of human beings around them and in different times and places Fortunately guiding both students personal engagement with literature and their close reading to appreciate the author s message and craft are not incompatible goals This book enthusiastically and intelligently addresses both imperatives first surveying what is gained when students are immersed in literature then celebrating and explicating the main features of

literature students need to understand to broaden their tastes and deepen their engagement at the same time they meet external standards then presenting a host of active methods for exploring all major genres of children s books and finally presenting suggestions for interdisciplinary teaching units grounded in literature Created by noted leaders in the fields of children s literature and literacy the book is enlivened by recurring features such as suggested reading lists issues for discussion links to technology and annotations of exemplary books

**Instructional Models in Reading** Steven A. Stahl, David A. Hayes, 2013-04-03 This book started with a simple idea examine models of reading instruction that have emerged during the past 20 years These models span a wide range of instruction representing a continuum from highly structured task analytic instruction to child centered and holistic instruction Each model has its own epistemology or views on how reading and instruction are to be defined The different epistemologies indicate different principles of instruction which in turn indicate different practices in the classroom Each model is also supported by a different research base In this volume leading proponents of these different models discuss their ideas about reading instruction thereby encouraging readers to make their own comparisons and contrasts The chapter authors seem to adopt the editors eclectic approach to some greater or lesser extent incorporating aspects of other models into their instruction as they see other goals Thus models of reading instruction are complex Complicating matters further is the fact that teachers hold their own models of reading which may or may not be congruent with those discussed here Although academically developed models influence college preservice and in service instruction teachers own models of reading filter the information that they take from what they learn from these perspectives By carefully examining these variables this book makes a firm contribution toward disciplined inquiry into what it means to teach reading
