ING_08 Review quote *Cross-Language Studies of Learning to Read and Spell*: C.K. Leong,R.M. Joshi,2013-03-14 The present volume is based on the proceedings of the Advanced Study Institute AS I sponsored by the North Atlantic Treaty Organization NATO held in Alvor Algarve Portugal A number of scholars from different countries participated in the two week institute on Cognitive and linguistic aspects of reading writing and spelling The present papers are further versions with modifications and refinements from those presented at the Advanced Study Institute Several people and organizations have helped us in this endeavor and their assistance is gratefully acknowledged Our special thanks are to the Scientific Affairs division of NATO for providing the major portions of the financial support Dr L V da Cunha of NATO and Dr THo Kester and Mrs Barbara Kester of the International Transfer of Science and Technology of the various aspects of the institute and ITST for their help and support the staff of Hotel Alvor Praia for making our stay a pleasant one by helping us to run the institute smoothly Learning English and Chinese as Foreign Languages Wen-Chuan Lin,2019-09-19 Learning English and Chinese is becoming increasingly important to the prospects of young people This book compares English as a Foreign Language teaching in Taiwan with Chinese as a Foreign Language education in England in order to highlight how classroom activities are embedded within multiple settings including ethnic or other social group cultures family and community resources and school visions or goals The book illustrates how in Taiwan different ethnic groups recognise access and value English language learning to varying extents Its findings illuminate why some ethnic groups are highly motivated to learn English and are able to gain privileged economic positions in the job market In England access to Chinese is marked by social class and the book argues that this could augment an educational apartheid that already exists in language teaching in secondary schools thereby exacerbating existing inequality The Psychology of Reading and Spelling Disabilities A.F.

Jorm,2017-11-06 Originally published in 1983 recent advances in cognitive psychology had revealed that reading and spelling disabilities may be due to deficits in basic cognitive processes Dr Jorm looks at each type of disability in detail in relation to normality as well as intellectual disability formerly called retardation and finds that the new research provides a useful approach to seemingly intractable problems He covers a broad range of topics including the social context of reading disabilities the role of biological factors remedial teaching and prevention of literacy problems He also gives a forward looking account of how research at the time on the cognitive processes in comprehension might aid our understanding of the

relatively neglected group of children who can read individual words yet fail to comprehend adequately Reading disabilities are increasingly serious in a culture which places an ever higher value on literacy and the discoveries of the cognitive psychologists are presented here in a way that will still be accessible to all those teachers and parents who want to know about developments in the past
