The Great Wall of China

Fill in the blanks in this article to learn about one of the most amazing structures ever built.

What's the biggest wall you've ever seen? Is it 30 feet tall? Is it thousands of miles long? Does it show up in some pictures from space? Probably not. There's only one wall that big. It's the Great Wall of China.

Two thousand years ago, China had many enemies. The emperor thought a strong wall would keep China secure. He had people mend old walls. He had them build new walls out of stone and mud. Then they connected them all, making one 3,000-mile-long wall. For the next 1,000 years, other emperors extended the wall. Finally, it stretched for 4,500 miles. Some of it has crumbled. But much of it still stands today. It is a symbol of national pride.
