No More Fake Reading Berit Gordon, 2017-07-07 For middle and high school teachers it's one of today's most vexing problems: How do you motivate students with varied interests and little appetite for classic literature to stop faking their way through texts and start advancing as skilled, engaged readers? Independent reading is an important part of the answer, but it's just that—a part of the whole. In this groundbreaking book, Berit Gordon offers the complete solution: a blended model that combines the benefits of classic literature with the motivational power of choice reading. With the blended model, teachers lead close examinations of key passages from classic texts, guiding students to an understanding of important reading strategies they can transfer to their choice books. Teachers gain a platform for demonstrating the critical reading skills students so urgently require, and students thrive on reading what they want to read. In this research-backed book, Gordon leads you step by step to classroom success with the blended model, showing the basics of getting your classroom library up and running, how to build a blended curriculum for both fiction and non-fiction units, keeping relevant standards in mind, tips and resources to help with day-to-day planning, ideas for selecting class novel passages that provide essential cultural capital and bolster students' reading skills, strategies for bringing talk into your blended reading classroom, how to reach the crucial learning goal of transfer, a practical user-friendly approach for assessing each student's progress. *No More Fake Reading* gives you all the tools you need to put the blended model to work for your students and transform your classroom into a vibrant reading environment. Berit Gordon coaches teachers as they nurture lifelong readers and writers. Her path as an educator began in the classroom in the Dominican Republic, before teaching in New York City public schools. She also taught at the Teachers College of Columbia University in English Education. She currently works as a literacy consultant in grades 3-12 and lives in Maplewood, New Jersey, with her husband and three children.

More Than Guided Reading Cathy Mere, 2005 Is there too much emphasis on guided reading in primary classrooms? It's a question that many educators like kindergarten teacher and literacy coach Cathy Mere are starting to ask. Guided reading provides opportunities to teach students the strategies they need to learn how to read increasingly challenging texts, but Cathy found that she needed to find other ways to help students gain independence. While maintaining guided reading as an important piece of their reading program, teachers need to offer students opportunities during the day to develop as readers: to learn to choose books, to find favorite genres and authors, and to talk about their reading. In *More Than Guided Reading*, Cathy shares her journey as she moved from focusing on guided reading as the center of her reading program to placing children at the heart of literacy learning, not only providing more time for students to discover their reading lives but also shaping instruction to meet the needs of the diverse learners in her classroom. By changing the structure of the day, Cathy found she was better able to adjust the support she was providing students, allowing time for whole-class focus lessons, conferences, and opportunities to share ideas, as well as reading from self-selected texts using the strategies, skills, and understandings acquired in reader's workshop. The focus lesson is the centerpiece of the workshop. It is

often tied to a read aloud and connected to learning from the previous day helping to build skills extend thinking and develop independence over time This thoroughly practical text offers numerous sample lessons questions for conferences and ideas for revamping guided reading groups It will help teachers tweak the mix of instructional components in their reading workshops and provoke school wide conversations about the place of guided reading in a complete literacy curriculum

Teens Choosing to Read Gay Ivey, Peter Johnston, 2023 In a sea of troubling reporting about education teaching reading and the wellbeing of teens Ivey and Johnston bring some good news that shows what happens when we stop underestimating young people This accessible book offers an engaging account of a 4 year study of adolescents who went from reluctant to enthusiastic readers These youth reported that reading not only helped them manage their stress but also helped them negotiate happier more meaningful lives This amazing transformation occurred when their teachers simply allowed them to select their own books invited them to read with no strings attached and provided time for them to do so These students nearly all of whom reported a previously negative relationship with reading began to read voraciously inside and outside of school performed better on state tests and transformed their personal relational emotional and moral lives in the process This illuminating book leads readers on a tour of adolescents reading lives in their own words offering a long overdue analysis of students deep engagement with literature The text also includes research to inform arguments about what students should and should not read and the consequences of limiting students access to the books that interest them through censorship Book Features Links young adults reading engagement with socio emotional and intellectual development Provides nuanced descriptions of teaching practices that facilitate student agency in learning Features student voices that have been absent in debates about what is appropriate for young people to read and under what circumstances Connects student perspectives on reading with positive outcomes of reading to research from other disciplines Illuminates the breadth and depth of the responsibilities of teaching English language arts
