Suvin, 1987-03-03 The Long March is a collection of poetry that refuses the split between the private world of the poet and the world of public affairs The poems in the book are largely written in a dialogue with the poetry of Ancient China but they are always sustained by a commitment to radical revaluation which recalls that of the playwright Bertolt Brecht

Water in a Changing World World Water Assessment Programme (United Nations), 2009 The United Nations World Water Development Report published every three years is a comprehensive review providing an authoritative picture of the state of the world's freshwater resources It offers best practices as well as in depth theoretical analyses to help stimulate ideas and actions for better stewardship in the water sector It is the only report of its kind resulting from the collaboration and contributions of the 26 UN agencies commissions program funds secretariats and conventions that have a significant role in addressing global water concerns The news media are full of talk of crises in climate change energy and food and troubled financial markets These crises are linked to each other and to water resources management Unresolved they may lead to increasing political insecurity and conflict Water is required to meet our fundamental needs and rising living standards and to sustain our planets fragile ecosystems Pressures on the resource come from a growing and mobile population social and cultural change

economic development and technological change Adding complexity and risk is climate change with impacts on the resource as well as on the sources of pressure on water The challenges though substantial are not insurmountable The Report shows how some countries have responded Progress in providing drinking water is heartening with the Millennium Development Goal target on track in most regions But other areas remain unaddressed and after decades of inaction the problems in water systems are enormous and will worsen if left unattended Leaders in the water sector can inform decisions outside their domain and manage water resources to achieve agreed socioeconomic objectives and environmental integrity Leaders in government the private sector and civil society determine these objectives and allocate human and financial resources to meet them Recognizing this responsibility they must act now Two volume set 336 96 pages case studies Includes CD ROM Published jointly with UNESCO Publishing *The State against Society* Grzegorz Ekiert, 1996-09-30 Classical images of state socialism developed in contemporary social sciences were founded on simple presuppositions State socialist regimes were considered to be politically stable due to their pervasive institutional and ideological control over the everyday lives of their citizens impervious to reform and change and representative of extreme political and economic dependency Despite their contrasting historical experiences they have been treated as basically identical in their institutional design social and economic structures and policies Grzegorz Ekiert challenges this notion in a comparative analysis of the major political crises in post 1945 East Central Europe Hungary 1956 63 Czechoslovakia 1968 76 and Poland 1980 89 The author maintains that the nature and consequences of these crises can better explain the distinctive experiences of East Central European countries under communist rule than can the formal characteristics of their political and economic systems or their politically dependent status He explores how political crises reshaped party state institutions redefined relations between party and state institutions altered the relationship between the state and various groups and organizations within society and modified the political practices of these regimes He shows how these events transformed cultural categories produced collective memories and imposed long lasting constraints on mass political behavior and the policy choices of ruling elites These crises shaped the political evolution of the region produced important cross national differences among state socialist regimes and contributed to the distinctive patterns of their collapse Resources in Education , 1997-10 Earth System Monitor , 2009
