Aviram, 1994 Provides a postmodern theory of poetry that sees rhythm as its essential quality *Intermediate Light* Robert Alexander Houstoun, 1925 **Aristotle's Gynecology** Mariska Leunissen, 2025 In Aristotle's *Gynecology* Mariska Leunissen examines Aristotle's methods for the establishment of gynecological facts within his natural science arguing that many of the gynecological phenomena at stake such as menstruation and the nature of menstrual blood the role of female pleasure during sex and women's experiences of erotic

dreams and their knowledge of conception and their experiences of false pregnancy and childbirth were mostly for socio cultural reasons not at all or not immediately accessible for a male natural scientific observer such as Aristotle Given this lack of immediate empirical evidence Aristotle employed alternative methods for the establishment of facts such as relying on signs and circumstantial empirical evidence or using analogical and probabilistic reasoning and relied heavily on existing expert reports such as mainly early medical sources but also sometimes verbal reports from women themselves Moreover Aristotle used a secondary standard for testing the results of this inquiry namely one which he originally developed for investigations into physically remote meteorological and cosmological phenomena that are not apparent to observation and according to which statements of facts are credible if they are ontologically possible Leunissen thus reconstructs Aristotle s gynecology in the context of his commitments to empiricism and his scientific methods for the fact establishing phase of natural science and elucidates the role his concepts of evidence credibility and signs play in his natural scientific research However through its focus on Aristotle s use of gendered knowledge and his reconstruction of natural phenomena believed to be characteristic of women Leunissen s book also offers a glimpse of the lived experiences and reproductive beliefs of women in Ancient Greece
