Literature and Sensation Anthony Uhlmann,2008-12-18

I never travel without my diary One should always have something sensational to read in the train Oscar Wilde Literature has always treated the sensational crime passion violence trauma catastrophe It has frequently caused or been at the centre of

scandal censorship and moral outrage But literature is also intricately connected with sensation in ways that are less well understood It mediates between the sensory world perception and cognition through rich modes of thought allied with perceptions and emotions and makes sense of profound questions that transcend the merely rational And at its boundaries literature engages with the uncanny realm in which knowledge presentiment or feeling is prior to articulation in words This book reviews the sensational dimension of literature according to themes that have too often been left to one side Literary theory has often privileged perception over sensation cognition over raw experience in focusing on semantics rather than sense The essays in this volume cover literature and sensation in all its facets drawing upon a range of approaches from evolutionary theory theories of mind perception philosophy and aesthetics The works considered are drawn from various literary periods and genres from the nineteenth century to contemporary prose and poetry including experiments in new media Literature and Sensation offers detailed and subtle readings of literature according to the sensations they represent incite or evoke in us and will be of interest to readers of literary theory ethics and aesthetics and theorists of new media art

Haunted Spaces in Twenty-First Century British Nature Writing Anneke Lubkowitz, 2020-06-08 This study investigates the figure of haunting in the New Nature Writing It begins with a historical survey of nature writing and traces how it came to represent an ideal of natural space as empty of human history and social conflict Building on a theoretical framework which combines insights from ecocriticism and spatial theory the author explores the spatial dimensions of haunting and hauntology and shows how 21st century writers draw on a Gothic repertoire of seemingly supernatural occurrences and spectral imagery to portray natural space as disturbed uncanny and socially contested Iain Sinclair and Robert Macfarlane are revealed to apply psychogeography's interest in hidden histories and haunted places to spaces associated with wilderness and the countryside Kathleen Jamie's allusions to the Gothic are put in relation to her feminist re writing of the outdoors and John Burnside's use of haunting is shown to dismantle fictions of the far north This book provides not only a discussion of a wide range of factual and fictional narratives of the present but also an analysis of the intertextual dialogue with the Romantic tradition which enfolds in these texts

Developing Place-responsive Pedagogy in Outdoor Environmental Education Alistair Stewart, 2020-02-25 This book is a rhizomatic curriculum autobiography that charts the author's efforts to develop and promote Australian outdoor environmental education practices that are inclusive of and responsive to the places in which they are performed Joining philosophical concepts created by Gilles Deleuze and Felix Guattari with William Pinar's autobiographical method for curriculum inquiry the author re considers the interrelated concepts contexts and complex conversations with colleagues students and others that have shaped his approach to curriculum pedagogy and research for fifteen years or more Emphasising the complexity of developing curricula and pedagogies that engage in a respectful and generative way with the natural and cultural history of the Australian continent the author explicates and enacts his attempts to think differently about the cultural curricular and pedagogical understandings that inform the practices of Australian outdoor environmental educators Outdoor environmental education in Australia has historically been influenced by imported universalist ideas particularly from the USA and the UK However during the last two decades a growing number of researchers in this field have challenged the applicability of such taken for granted approaches and advocated the development of curricula and pedagogies informed by the unique biogeographical and cultural histories of the locations in which educational experiences take place As this book demonstrates Alistair Stewart is prominent among the vanguard of Australian outdoor environmental educators who have led such advocacy by combining practical experience with theoretical rigour
