Science Fiction, Fantasy & Horror, 1990 A comprehensive bibliography of books and short fiction published in the English language

Dreamland Phil Patton, 2012-10-31 There is a place in the Nevada desert the size of Belgium that doesn't officially exist. It is the airbase where test flights of our top secret experimental military aircraft are conducted and not coincidentally where the conspiracy theorists insist the Pentagon is hiding UFOs and aliens. This is Dreamland or Area 51. For Phil Patton the idea of writing a travel account of a place he couldn't actually visit was irresistible. What he found was a world where Chick Yeager and the secret planes of the Cold War converged with the Nevada Test Site and alien landings at Roswell. A think tank for aviation engineering Dreamland can be seen from a summit outside the base's perimeter a hundred miles north of Las Vegas. On Freedom Ridge groups of airplane buffs gather with their camouflage outfits and binoculars. These are the Stealth chasers the Skunkers guys with code names like Agent X and Zero hoping for a glimpse of the rumored raylike shapes of planes like Black Manta and the mother ship. The most mysterious craft is Aurora the successor to the legendary U 2 said to run on methane and fly as fast as Mach 6. Scanning the same horizon the UFO buffs are looking for the hovering lights and doughnut shaped contrails of alien aircraft. Are they looking at something sinister and mysterious? Imagined. Or more terrestrial than they think. Dreamland shows how much we need mystery in the information age and how the cultures of nuclear power and airpower merge with the folklores of extraterrestrials and earthly conspiracies. Patton found people who found themselves in the mysteries of the place. John Lear the son of aviation pioneer Bill Lear who gave his name to the jet served as a pilot for the CIA's Air America but back home he became fascinated by UFOs and eventually believed in it all the underground bases the alien human hybrids the secret treaties. But was he a true believer or part of a disinformation campaign? Bob Lazar seems to know when the saucers will come and has made three clear sightings at night along Dreamland's perimeter but is his story real or a vision of what's possible? Dreamland is an exploration of America's most secret place the base for our experimental airplanes the fount of UFO rumors an offshoot of the Nevada Test Site. How this blackspot came to exist its history its creators its spies and counterspies is Phil Patton's tale. He tunnels into the subcultures of the conspiracy buffs the true believers and the aeronautic geniuses creating a novelistic tour de force destined to make us all rethink our convictions about American know how and alien inventiveness.

Without his right hand man Phule has no idea what his left hand is doing. So he takes off after his errant butler just as General Blitzkrieg decides to make a surprise visit to Zenobia. And the only thing Blitz would like better than catching Phule off guard is to catch Phule AWOL. Praise for the Phule

Black and Brown Planets Isiah Lavender III,2014-09-25 Black and Brown Planets embarks on a timely exploration of the American obsession with color in its look at the sometimes contrary intersections of politics and race in science fiction The contributors including De Witt D Kilgore Edward James Lisa Yaszek and Marleen S Barr among others explore science fiction worlds of possibility literature television and film lifting blacks Latin Americans and indigenous peoples out from the background of this historically white genre This collection considers the role of race and ethnicity in our visions of the future The first section emphasizes the political elements of black identity portrayed in science fiction from black America to the vast reaches of interstellar space framed by racial history In the next section analysis of indigenous science fiction addresses the effects of colonization helps discard the emotional and psychological baggage carried from its impact and recovers ancestral traditions in order to adapt in a post Native apocalyptic world Likewise this section explores the affinity between science fiction and subjectivity in Latin American cultures from the role of science and industrialization to the effects of being in and moving between two cultures By infusing more color in this otherwise monochrome genre Black and Brown Planets imagines alternate racial galaxies with viable political futures in which people of color determine human destiny **Veiled**

Responding to today's political media landscape through discussions of Fox News and Presidential inaugurations, Vernallis shows how a media literacy that exceeds newscasts and campaign advertising is central to engaging with the democratic commons. Forays into industry studies, neuroscience, and ethics also inform her readings. By creating our own content and knowing what corporations, the wealthy, and the government do through media, Vernallis contends, we can create a more just world.

Firefly Revisited Michael Goodrum, Philip Smith, 2015-02-02 According to Joss Whedon, the creator of the short-lived series *Firefly* (2002), the cult show is about nine people looking into the blackness of space and seeing nine different things. The chronicles of crewmembers on a scruffy space freighter, *Firefly* ran for only four months before its abrupt cancellation. In that brief time, however, it established a reputation as one of the best science fiction programs of the new millennium, sharply written, superbly cast, and set on an exotic multicultural frontier unlike anything ever seen on the small screen. The show's large enthusiastic fan following supported a series of comics and a theatrical film, *Serenity* (2005), that extended the story, deepened the characters, and revealed new wonders and dangers on the deep space frontier. In *Firefly Revisited: Essays on Joss Whedon's Classic Series*, Michael Goodrum and Philip Smith present a collection that reflects on the program, the characters, and the post-cancellation film and comics that grew out of the show. The contributors to this volume offer fresh perspectives on familiar characters and blaze new trails into unexplored areas of the *Firefly* universe. Individual essays explore the series' place in the history of the space Western subgenre, the political economy of the Alliance, and the uses of music and language in the series to immerse audiences in a multicultural future. These essays look at how the show offered viewers high adventure as well as engaged with a range of themes that still resonate today. As such, *Firefly Revisited* will intrigue the show's many fans as well as Whedon scholars and anyone interested in the twenty-first century renaissance of science fiction television.

Representations of the Post/human Elaine L. Graham, 2002 This work draws together a wide range of literature on contemporary technologies and their ethical implications. It focuses on advances in medical, reproductive, genetic, and information technologies.
