inevitable scary or funny in this classic tale Can organic life be reanimated using electricity or genetic manipulation If so could Frankenstein s monster really teach itself to read and speak as Mary Shelley imagined Do monsters have rights or responsibilities to those who would as soon kill them What is it about music that so affects Frankenstein s monster or any of us What does Mel Brook s Frau Blucher say to contemporary eco feminism Why are some Frankenstein s flops and others historic successes Is there a true Frankenstein Why are children but not adults drawn to Shelley s monster And what is a monster anyways Frankenstein and Philosophy brings 25 philosophers to stitch together these and other questions as they apply the history of philosophy to history s greatest horror franchise Some chapters treat the Frankenstein films others the original novel and yet others the many comic books novels and modern adaptations Together they pay tribute to perhaps the most enduring pop culture icon and the fundamental fears hopes questions and puzzles it raises *The Long History of the Future* Nicole Kobie,2024-07-04 We love to imagine the future But why are groundbreaking future technologies always just around the corner and never a reality For decades we ve delighted in dreaming about a sci fi utopia from flying cars and bionic humans to hyperloops and smart cities And why not Building a better world be it a free flying commute or an automated urban lifestyle is a worthy dream Given the pace of technological change nothing seems impossible anymore But why are these innovations always out of reach Delving into the remarkable history of technology *The Long History of the Future* introduces us to the clever scientists genius engineers and eccentric innovators who first brought these ideas to life and have struggled to make them work since These stories reveal a more realistic picture of how these technologies may evolve and how we ll eventually get to use them You may never be able to buy a fully driverless car but automated braking and steering could slash collision rates Smart cities won t perfect city life but they could help empty bins on time Hyperloops may never arrive but superfast trains are already here We always believe current technology is the best it could be By looking to the past and the future Nicole Kobie shows how history always proves us wrong and how what lies ahead may not be what we imagine but so much better *Literacy and Learning in the Content Areas* Sharon Kane,2017-07-05 The 3rd Edition of *Literacy Learning in the Content Areas* helps readers build the knowledge motivation tools and confidence they need as they integrate literacy into their middle and high school content area classrooms Its unique approach to teaching content area literacy actively engages preservice and practicing teachers in reading and writing and the very activities that they will use to teach literacy to their own students in middle and high school classrooms Rather than passively learning about strategies for incorporating content area literacy activities readers get hands on experience in such techniques as mapping webbing anticipation guides booktalks class websites and journal writing and reflection Readers also learn how to integrate children s and young adult literature primary sources biographies essays poetry and online content communities and websites into their classrooms Each chapter offers concrete teaching examples and practical suggestions to help make literacy relevant to students content area learning Author Sharon Kane demonstrates how relevant reading writing speaking
