Gondwana Landscapes in southern South America Jorge Rabassa,Cliff Ollier,2014-04-11 This book presents extensive and new information on the geomorphology of cratonic areas of southern South America It includes valuable data relating to recurrent controversies in general geomorphology beyond the boundaries of South America and reveals the great need to integrate many different aspects of geomorphology in regional studies With the focus on ancient landscapes and especially on planation surfaces it addresses the question of what processes could form such huge features and how they can be preserved for so long Many of the papers include maps of planation surfaces or other geomorphic units The volume brings together an up to date state of the art collection of information on South American geomorphology and shows beyond doubt that geomorphology is on the same time scale as global tectonics biological evolution and major climate change Some of the papers describe ancient geomorphological features of areas that have never been studied or published before while others describe regions which are totally unknown to the public The scope of the book extends from tropical latitudes north of the Tropic of Capricorn south to freezing Patagonia in the roaring fifties more than 3 500 km from north to south Including over one thousand citations from geological and geomorphological literature this volume will serve as a starting point for a whole new phase of studies of the fascinating landscape history of southern South America

Gondwana Industrial Clays Patricia Eugenia Zalba,Martín Eduardo Morosi,María Susana Conconi,2016-08-30 This book is a study of the sedimentary and residual deposits of the Tandilia System also known as the Sierras Septentrionales of Buenos Aires Argentina Offering an overview of the geology stratigraphy petrology mineralogy and industrial applications of these deposits it is organized geographically and according to the different districts of the province s diverse counties where economically important Neoproterozoic and Eopaleozoic clay reserves occur Today most of the sediments of the Tandilia basin are found in South Africa due to the breakup of the continents which began in the Jurassic This partly accounts for the difficulty in interpreting the geology of Tandilia Apart from its extreme age and almost complete lack of fossil remains for a long time the tectonics that affected the whole area presented a real challenge as horst and graben structures added to the difficulty of geological correlations Despite being 700 Ma old most of the physical chemical properties of the sediments have remained unchanged The Microbially Induced Sedimentary Structures MISS found in the tidal and peritidal deposits also hold untouched information on the mystery of the beginning of life on earth The fact that the Buenos Aires province is the country s first non metallic productive center together with the high quality of its clay deposits its easy access from main routes and proximity to large consumer centers have made these materials highly important in the province s construction industry

 María Alonso-Zarza, Lawrence H. Tanner, 2006-01-01 This volume presents current understanding of the mechanisms and
 environments of the formation of calcretes and palustrine carbonates Through a series of specific field examples papers in
 this volume illustrate the wide variety of potential applications of these types of deposits The papers presented here cover a
 wide array of ages and environmental settings of calcrete and palustrine deposition and include many interesting
 applications such as the climatic and geomorphic controls on calcrete formation possible modern analogues for palustrine
 carbonates the interplay between palustrine pedogenic and diagenetic processes the utility of radio isotopic methods for
 dating pedogenic carbonates applications to understanding landscape evolution and reconstruction of diagenetic sequences
 The result is a state of the art book on these deposits so common in the geological record and in recent environments
