This book examines in detail the acceptability status of sentences in the following five English constructions and elucidates the syntactic semantic and functional requirements that the constructions must satisfy in order to be appropriately used There Construction One s Way Construction Cognate Object Construction Pseudo Passive Construction and Extraposition from Subject NPs It has been argued in the frameworks of Chomskyan generative grammar relational grammar conceptual semantics and other syntactic theories that the acceptability of sentences in these constructions can be accounted for by the

unergative unaccusative distinction of intransitive verbs However this book shows through a wide range of sentences that none of these constructions is sensitive to this distinction For each construction it shows that acceptability status is determined by a given sentence's semantic function as it interacts with syntactic constraints which are independent of the unergative unaccusative distinction and with functional constraints that apply to it in its discourse context The Juvenile Missionary Magazine (and Annual).
