Kapsch,Robert James Kapsch,2004 Accompanying CD ROM has images from the book in TIFF format which can be viewed with the Extensis Portfolio browser included on the disc or with a graphics program such as Adobe Photoshop as well as links to four Library of Congress websites      **Engineering America** Richard Haw,2020-02-12 John Roebbling was one of the nineteenth century s most brilliant engineers ingenious inventors successful manufacturers and fascinating personalities Raised in a German backwater amid the war torn chaos of the Napoleonic Wars he immigrated to the US in 1831 where he became wealthy and acclaimed eventually receiving a carte blanche contract to build one of the nineteenth century s most stupendous and daring works of engineering a gigantic suspension bridge to span the East River between New York and Brooklyn In between he thought wrote and worked tirelessly He dug canals and surveyed railroads he planned communities and founded new industries Horace Greeley called him a model immigrant generations later F Scott Fitzgerald worked on a script for the movie version of his life Like his finest creations Roebbling was held together by the delicate balance of countervailing forces On the surface his life was exemplary and his accomplishments legion As an immigrant and employer he was respected throughout the world As an engineer his works profoundly altered the physical landscape of America He was a voracious reader a fervent abolitionist and an engaged social commentator His understanding of the natural world however bordered on the occult and his opinions about medicine are best described as medieval For a man of science and great self certainty he was also remarkably quick to seize on a whole host of fads and foolish trends Yet Roebbling held these strands together Throughout his life he believed in the moral application of science and technology that bridges along with other great works of connection the Atlantic Cable the Transcontinental Railroad could help bring people together erase divisions and heal wounds Like Walt Whitman Roebbling was deeply committed to the creation of a more perfect union forged from the raw materials of the continent John Roebbling was a complex deeply divided yet undoubtedly influential figure and this biography illuminates not only his works but also the world of nineteenth century America Roebbling s engineering feats are well known but the man himself is not for alongside the drama of large scale construction lies an equally rich drama of intellectual and social development and crisis one that mirrored and reflected the great forces trials and failures of nineteenth century America      **The Texture of Industry** Robert B. Gordon,Patrick M. Malone,1997-02-06 While historians have given ample attention to stories of entrepreneurship invention and labor conflict they have told us little about actual work places and how people worked Workers seldom wrote about their daily employment However they did leave behind their tools products shops and factories as well as the surrounding industrial landscapes and communities In this book Gordon and Malone look at the industrialization of North America from the perspective of the industrial

archaeologist Using material evidence from such varied sites as Indian steatite quarries automobile plants and coal mines they examine manufacturing technology transportation systems and the effects of industrialization on the land Their research greatly expands our understanding of industry and focuses attention on the contributions of anonymous artisans whose skills shaped our industrial heritage

**Structural Iron 1750-1850** R.J.M. Sutherland,2016-12-05 This book deals with the period when iron became the dominant high technology material increasingly taking over from timber and masonry It was necessary for the engines and machines of the new industries but equally vital for the vast civil engineering works which supported this industrialisation It was these works mills warehouses dockyards and above all bridges which so impressed the public in the early 19th century The papers selected here trace the evolving structural uses of cast and wrought iron in frames and roofs for buildings and look in particular at the development of bridge design and construction in America France and Russia as well as in Britain They cover the processes of design and testing and at the same time throw much light on the attitudes and careers of the engineers themselves
