Secrets Of The Earths Magnetic Field:

Earth's Magnetic Field Secrets Dennis Brooks, 2015-03-04 The Old Theory Until now there was only one theory regarding the source of Earth's magnetic field which is the internal dynamo theory This theory was accepted because it offered the best explanation at the time Also much research has been done to support the theory According to the internal dynamo theory a dynamo near the center of the planet generates the current that produces the magnetic field This dynamo would be in the liquid outer core of the planet It would produce the magnetic axis and project it from the planet The axis would expand and spread the magnetic field around the planet This theory also suggests that the internal dynamo is sustaining itself by using fuel from Earth's core The internal dynamo theory has changed over the years At first scientists thought that a bar magnet was in the center of the planet and the compass needle pointed to the poles of that magnet This made perfect sense at the time because we can see that the same thing happens when we put a compass near a bar magnet The Bar Magnet In The Sun image demonstrates the idea of the bar magnet theory However this example shows the bar magnet imbedded within the sun because just like the planets the sun also has a magnetic field which is more complex than Earth's magnetic field Scientists have tried to use the internal dynamo theory to explain the magnetic fields of all the planets some moons and the sun However the old model does not work for the sun moon and other planets The bar magnet concept lasted a long time as the main theory regarding the source of Earth's magnetic field However while trying to apply it to other cases scientists found problems with the theory Over the years they discovered that a bar magnet could not hold magnetism above the temperature of 770 degrees centigrade because high heat destroys magnetism This caused the theory to gradually evolve over time

Secrets of Earth's Magnetic Field Dennis Brooks, 1999-03 Researchers first thought a huge magnet ran through the planet Next they thought there was a dynamo in the inner core Then they thought a dynamo might exist in the outer core of the planet Recently scientists have been studying the dynamo that is found with every planet that has a magnetic field This research has shown that the outer dynamo system is the source of the magnetic field The magnetic field of each planet Earth Jupiter Saturn Uranus and Neptune is produced by the ring currents in the radiation belts Each planet is a component of the dynamo system that produces the magnetic field

Legends of the Secret Tunnels of Malacca Dennis De Witt, 2018-01-01 Tales of the subterranean tunnels under the historic town of Malacca has existed for over a century There were stories of tunnels that served as the governor s secret emergency exit from the fortress and a mile long tunnel that once

connected the fortress of Malacca to the fort on St John's hill strategically built for the defence of the town. There were also stories of a tunnel under St Paul's hill and how people had gone into these tunnels but were never to be seen again because they were eaten alive by a giant mythical serpent who guards the tunnels. What secrets do the tunnels contain and why were people willing to risk their life by descending into the dark and unknown orifices below Malacca? Is there lost treasure still buried in Malacca? Did the last Sultan of Malacca stash his huge cache of gold after the Portuguese captured Malacca and the secret vault still remains undiscovered till today? Was Malacca Ptolemy's Golden Chersonese and the Ophir the source of King Solomon's gold? This book uncovers the layers of history that unfolds Malacca's most bizarre and amazing legend.

The Tesla Secret, Books 1, 2 & 3 Mike Wells, 2019-12-11 When a Stanford University physicist is kidnapped and whisked away to a top secret research facility near Moscow, he finds that a Russian oligarch has developed a free energy machine based on the lost work of Nikola Tesla. There he is forced to finish developing the earthshaking invention. If perfected, the machine will provide unlimited pollution-free electrical energy extracted from the earth's very atmosphere. In so doing, it would make the oil, gas, and alternative energy industries obsolete. It could also solve the world's problems with poverty and perhaps even climate change. Torn between his scientific ego and the fact that people driven by profit alone are in control of technology that has such monumental humanitarian potential, the professor reluctantly begins to help with the project. Working side by side with him is a beautiful woman from Tajikistan who has special knowledge related to the device's operation and is also being held against her will. The professor soon develops feelings for her, and they both try to escape, which takes them on a harrowing chase through Moscow.
