It addresses virtual private networks, IP telephony, and voice gateways and IPsec, and examines the manner by which various protocols and applications operate. Almost anything you can imagine can be researched, compared, admired, studied, and in many cases bought with the click of a mouse. The Internet has changed our lives, putting a world of opportunity before us. Unfortunately, it has also put a world of opportunity into the hands of those whose motives are less than honorable. A firewall, a piece of software or hardware that erects a barrier between your computer and those who might like to invade it, is one solution.
