By far the most challenging and comprehensive book available. 700 unique, extremely challenging problems. Thoroughly covers material likely to be on math ACT. Many challenging, realistic problems similar to the hardest that may appear on the ACT math exam in areas such as number theory and probability. Problems arranged by topic and difficulty. Check out 40-page sample available at <https://cutt.ly/rkVZ1yB> and sample challenging 60-question test at <https://cutt.ly/Rk2HZGs>. From a review of my previous book: This book helped my son get 800 on the SAT Math 2 in the 2020 October test. My son was shooting for a 800. He went through the other more common books: Barrons, Princeton Review, and even the harder Chung book, but was still not consistently scoring high in practice tests. It presented him with many of the hard, challenging problems one could encounter on the test, which is exactly what was needed to prepare for a top score and overcome the last unexpected 10%.
