The Decline of the Congress System Miroslav Šedivý, 2018-07-30 Following the Congress of Vienna in 1815 the Congress System became the primary instrument of diplomacy in Europe. So central was the Austrian Chancellor Metternich to the political legal Congress System that the period has often been referred to as the Age of Metternich. In this book Miroslav Šedivý analyses Metternich's policy towards the pre-united Italian states from 1830 to 1848. With an emphasis on geopolitics and international law and drawing attention to the unsettled role of the Italian states within European diplomacy in the period, this book explains why the Italian peninsula never developed into the stable region that Metternich hoped to establish at the heart of the Congress System. Owing to the self-interested policies of some European Powers as well as the larger role of the Italian states, Metternich proved unable to bring about the transformation of European politics in Italy. Using a thorough analysis of the role that Italy played in the Congress System and based on extensive research in 18 European archives, this book explains why it was in Italy that the first war broke out after the end of the Napoleonic Wars, an event representing the first brutal blow to the Congress System.

The Struggle with Leviathan Emiel Lamberts, 2016-05-02 A panoramic picture of international politics and the formation of the modern State. The opposition to the omnipotence of the State as symbolised by Thomas Hobbes' *Leviathan* 1651 had a significant impact on the political organisation of European society. A liberal strategy intended to provide a protective legal status for individual citizens, whereas a social strategy aimed to strengthen the social fabric to counterbalance the power of the State. Gradually both strategies became interwoven. *The Struggle with Leviathan* pays special attention to the social strategy developed by conservative and ecclesiastical circles against the omnipotence of the State and is structured around the fascinating biography of the Austrian diplomat Gustav von Blome, a grandson of Metternich and an important opponent of Bismarck. He proved to be a transitional figure between aristocratic conservatism and Christian democracy, which had a great influence on European integration after 1945. Besides Blome, several other dramatis personae, statesmen, prelates, political and social activists are featured. As a result, the book reads like a compelling narrative. At the same time, it offers a broadly sketched historical fresco of international politics and the gradual formation of the modern State. The original Dutch edition of this book, *Het gevecht met Leviathan*, has been highly praised in the Dutch and Flemish press and was awarded the biennial international Arenberg Prize for European History and Culture.

Metternich Wolfram Siemann, 2019-11-01 Wolfram Siemann tells a new story of Clemens von Metternich, the Austrian at the center of nineteenth-century European diplomacy.

Known as a conservative and an uncompromising practitioner of realpolitik in fact Metternich accommodated new ideas of liberalism and nationalism insofar as they served the goal of peace And he promoted reform at home
