Robinson Crusoe 1,000,000 A. D. John Argo, 2014-12-21 Library Journal in their 2003 review of the print edition offered warm praise for this fresh original new approach to a timeless classic and recommended it for large libraries everywhere In its initial appearance as an e book at Fictionwise this novel sold thousands of copies and garnered over 400 reviews almost all positive most of them raves Synopsis follows at end below It s a soaring imaginative science fiction novel in a well established long standing tradition called Robinsonades typically about shipwrecked marooned adventurers whose science fiction subset alone includes the following Robinson Crusoe on Mars film 1964 The Island of Dr Moreau novel H G Wells 1896 films 1977 1996 Enemy Mine film 1985 Lord of the Flies novel 1953 Nobel Laureate William Golding film 1963 and most recently Andy Weir s 2011 self published SF novel The Martian which became a successful major Hollywood film in 2014 There will be many more in the future maybe even a film based on Robinson Crusoe 1 000 000 A D Note the original Robinson Crusoe 1719 novel by Daniel Defoe is NOT a children s story Although it has been borrowed revised and sanitized made into Disney fuzzy bunny cartoons abridged for children s editions Daniel Defoe wrote a dark violent bloody novel about murder betrayal slavery and cannibal feasts The website www.clocttowerbooks.com cites at least one academic expert on this plus info on pacing point of view homages characters names and many other fascinating topics BRIEF SYNOPSIS A million years into a totally unexpected future our hero is the last man on Earth Nobody has ever been so alone Alex Kirk awakens a million years from now utterly alone and in terrible danger on a brave new Earth Humankind has been extinct for eons and Alex Kirk is at best an accident an afterthought in an uncaring universe filled with dreadful secrets This is more than a purely entertaining DarkSF novel in the rich tradition of Blade Runner Alien Dark City and other atmospheric poetic literary SF It s a stark warning about the dangers of genetic engineering that will soon be the greatest menace to humankind in history scarier than 20th Century atomic bomb fears If you re looking for post apoc with a plausible reason here it is He is marooned like no human ever before in time and space He can never meet another human because he is a clone born in a wrecked moss covered breeding tank deep in a sentient cave He has only the original Alex Kirk s memories to sustain him but those are brittle and fragmented in Alex s newly formed mind And yet Alex Kirk summons the determination to live to dream and to strive against all despair Earth in 1 000 000 A D is a planet of shocks and surprises from huge saltwater flowers to the giant butterflies that pollinate them Sinister and cunning black furred evolved wolverine bear Rippers with boar tusks lurk hour after hour waiting for Alex to make a single mistake so they can devour him This scary new world has living caves that swallow people armed and marauding aftermen a haunted village of long dead clone men and women a valley formed when an ancient university crumbled and its experimental laboratories fissured with a swift flowing river between them a valley littered with skulls picked over by Rippers and other un things in the long afterglow of old Earth One day solitary lonely Alex sees a curious smudge in space beside the moon He will discover it encapsulates the secret of what happened to humankind

and the key to his own fate Starting alone naked and with nothing except a fierce will to survive Alex courageously explores battles and conquers He ultimately confronts the enigma of who he is and why ancient humans left him shipwrecked and alone in eternity Is there a woman Friday to relieve his nightmare existence Read this novel and learn the answer Hint strawberry ice cream Rewriting Crusoe Jakub Lipski,2020-09-17 Published in 1719 Defoe s Robinson Crusoe is one of those extraordinary literary works whose importance lies not only in the text itself but in its persistently lively afterlife German author Johann Gottfried Schnabel who in 1731 penned his own island narrative coined the term Robinsonade to characterize the genre bred by this classic and today hundreds of examples can be identified worldwide This celebratory collection of tercentenary essays testifies to the Robinsonade s endurance analyzing its various literary aesthetic philosophical and cultural implications in historical context Contributors trace the Robinsonade s roots from the eighteenth century to generic affinities in later traditions including juvenile fiction science fiction and apocalyptic fiction and finally to contemporary adaptations in film television theater and popular culture Taken together these essays convince us that the genre s adapt ability to changing social and cultural circumstances explains its relevance to this day Published by Bucknell University Press Distributed worldwide by Rutgers University Press Robinson Crusoe 1,000,000 A.D. Imagining Mars Robert Crossley,2011-01-03 Mars in the human imagination from the invention of the telescope to the present For centuries the planet Mars has captivated astronomers and inspired writers of all genres Whether imagined as the symbol of the bloody god of war the cradle of an alien species or a possible new home for human civilization our closest planetary neighbor has played a central role in how we think about ourselves in the universe From Galileo to Kim Stanley Robinson Robert Crossley traces the history of our fascination with the red planet as it has evolved in literature both fictional and scientific Crossley focuses specifically on the interplay between scientific discovery and literary invention exploring how writers throughout the ages have tried to assimilate or resist new planetary knowledge Covering texts from the 1600s to the present from the obscure to the classic Crossley shows how writing about Mars has reflected the desires and social controversies of each era This astute and elegant study is perfect for science fiction fans and readers of popular science
