Robocup 2001 Robot Soccer World Cup V:

RoboCup 2001: Robot Soccer World Cup V Andreas Birk, Silvia Coradeschi, Satoshi Tadokoro, 2003-08-02 This book is the fifth official archival publication devoted to RoboCup. It documents the achievements presented at the 5th Robot World Cup Soccer Games and Conferences held in Seattle Washington USA in August 2001. The book contains the following parts: introduction, champion teams, challenge award finalists, technical papers, poster presentations, and team descriptions arranged according to various leagues. This book is mandatory reading for the rapidly growing RoboCup community as well as a valuable source of references and inspiration for R D professionals interested in multi agent systems, distributed artificial intelligence, and intelligent robotics.

RoboCup 2002: Robot Soccer World Cup VI Gal A. Kaminka, Pedro U. Lima, Raul Rojas, 2003-08-04 RoboCup 2002, the 6th Robot World Cup Soccer and Rescue Competitions and Conference, took place during June 19-25, 2002, at the Fukuoka Dome, main venue in Fukuoka, Japan. It was by far the RoboCup event with the largest number of registered participants: 1004 persons distributed in 188 teams from 29 countries and visitors around 120,000 persons. As was done in its previous editions since 1997, the event included several robotic competitions and an international symposium. The papers and posters presented at the symposium constitute the main part of this book. League reports in the national section describe significant advances in each league and the results. The symposium organizers received 76 submissions, among which 17 papers (22%) were accepted for oral presentation at the symposium. The first section of the book and 21 papers (29%) were accepted as posters, second section of the book. Most papers were evaluated by three reviewers, each chosen from the members of the International Program Committee (IPC). The IPC consisted of a balanced combination of regular RoboCup participants and researchers from outside this community. The reviewers worked hard to guarantee a fair review process; the result of their work was a high quality symposium with very interesting presentations.

RoboCup 2004: Robot Soccer World Cup VIII Daniele Nardi, Martin Riedmiller, Claude Sammut, José Santos-Victor, 2005-03-23 These are the proceedings of the RoboCup 2004 Symposium held at the Instituto Superior Técnico in Lisbon, Portugal, in conjunction with the RoboCup competition. The papers presented here document the many innovations in robotics that result from RoboCup. A problem in any branch of science or engineering is how to devise tests that can provide objective comparisons between alternative methods. In recent years, competitive engineering challenges have been established to motivate researchers to tackle difficult problems while providing a framework for the comparison of results. RoboCup was one of the first such competitions and has been a model for the organization of challenges following sound scientific principles. In addition to the competition, the associated symposium provides a forum for researchers to present refereed papers. But for RoboCup, the symposium has the greater goal of encouraging the exchange of ideas between teams so that the competition as a whole progresses from year to year and strengthens its contribution to robotics. One hundred and eighteen papers were submitted to the Symposium. Each paper was reviewed by at least two international referees. 30 papers were accepted for

presentation at the Symposium as full papers and a further 38 were accepted for poster presentation The quality of the Symposium could not be maintained without the support of the authors and the generous assistance of the referees

Robot Soccer Vladan Papić,2010-01-01 The idea of using soccer game for promoting science and technology of artificial intelligence and robotics was presented in the early 90s of the last century Researchers in many different scientific fields all over the world recognized this idea as an inspiring challenge Robot soccer research is interdisciplinary complex demanding but most of all fun and motivational Obtained knowledge and results of research can easily be transferred and applied to numerous applications and projects dealing with relating fields such as robotics electronics mechanical engineering artificial intelligence etc As a consequence we are witnesses of rapid advancement in this field with numerous robot soccer competitions and a vast number of teams and team members The best illustration is numbers from the RoboCup 2009 world championship held in Graz Austria which gathered around 2300 participants in over 400 teams from 44 nations Attendance numbers at various robot soccer events show that interest in robot soccer goes beyond the academic and R
