RoboCup 2004: Robot Soccer World Cup VIII Daniele Nardi, Martin Riedmiller, Claude Sammut, José Santos-Victor, 2005-03-23
These are the proceedings of the RoboCup 2004 Symposium held at the Instituto Superior Técnico in Lisbon, Portugal, in conjunction with the RoboCup competition. The papers presented here document the many innovations in robotics that result from RoboCup. A problem in any branch of science or engineering is how to devise tests that can provide objective comparisons between alternative methods. In recent years, competitive engineering challenges have been established to motivate researchers to tackle difficult problems while providing a framework for the comparison of results. RoboCup was one of the first such competitions and has been a model for the organization of challenges following sound scientific principles. In addition to the competition, the associated symposium provides a forum for researchers to present refereed papers. But for RoboCup, the symposium has the greater goal of encouraging the exchange of ideas between teams so that the competition as a whole progresses from year to year and strengthens its contribution to robotics. One hundred and eighteen papers were submitted to the Symposium. Each paper was reviewed by at least two international referees. 30 papers

were cepted for presentation at the Symposium as full papers and a further 38 were accepted for poster presentation The quality of the Symposium could not be maintained without the support of the authors and the generous assistance of the referees

Robot Soccer Vladan Papić,2010-01-01 The idea of using soccer game for promoting science and technology of artificial intelligence and robotics was presented in the early 90s of the last century Researchers in many different scientific fields all over the world recognized this idea as an inspiring challenge Robot soccer research is interdisciplinary complex demanding but most of all fun and motivational Obtained knowledge and results of research can easily be transferred and applied to numerous applications and projects dealing with relating fields such as robotics electronics mechanical engineering artificial intelligence etc As a consequence we are witnesses of rapid advancement in this field with numerous robot soccer competitions and a vast number of teams and team members The best illustration is numbers from the RoboCup 2009 world championship held in Graz Austria which gathered around 2300 participants in over 400 teams from 44 nations Attendance numbers at various robot soccer events show that interest in robot soccer goes beyond the
