Subcommittee on Science, Research, and Technology,1989 **Robot Intelligence Technology and Applications 6** Jinwhan Kim,Brendan Englot,Hae-Won Park,Han-Lim Choi,Hyun Myung,Junmo Kim,Jong-Hwan Kim,2022-03-31 This book aims at serving the researchers and practitioners in related fields with a timely dissemination of the recent progress on robotics and artificial intelligence This book is based on a collection of papers presented at the 9th International Conference on Robot Intelligence Technology and Applications RiTA held at KAIST in Daejeon Korea in a hybrid format on December 16 17 2021 Humankind is getting through the third year of COVID 19 pandemic While this pandemic has made everyone s life so challenging it has also expedited transition of our everyday lives into a new form often called the new normal Although many people often use the terminology perhaps we still do not have a consensus about what it is and what it should be like One thing that is clear is that robotics and artificial intelligence technologies are playing critical roles in this phase transition of our everyday lives We see last mile delivery robots on the street AI embedded service robots in the restaurants uninhabited shops non face to face medical services conferences and talks in metaverses and AI based online education programs For better readability the total of 53 papers are grouped into four chapters Chapter I Motion Planning and Control Chapter II Design and Robot Application Chapter III Sensing Perception and Recognition and Chapter IV Cognition Autonomy and Intelligence For those who have research on robot intelligence technology we believe this book will help them understand the recent robot technologies and applications and enhance their study **Novel Design and Applications of Robotics**

Technologies Zhang, Dan,Wei, Bin,2018-09-14 Through expanded intelligence the use of robotics has fundamentally transformed a variety of fields including manufacturing aerospace medical social services and agriculture Providing successful techniques in robotic design allows for increased autonomous mobility which leads to a greater productivity level Novel Design and Applications of Robotics Technologies provides innovative insights into the state of the art technologies in the design and development of robotic technologies and their real world applications The content within this publication represents the work of interactive learning microrobot swarms and service robots It is a vital reference source for computer engineers robotic developers IT professionals academicians and researchers seeking coverage on topics centered on the application of robotics to perform tasks in various disciplines **Intelligent Robotics and Applications** Caihua Xiong,Yongan Huang,Youlun Xiong,2008-10-14 These two volumes constitute the refereed proceedings of the First

International Conference on Intelligent Robotics and Applications ICIRA 2008 held in Wuhan China in October 2008 The 265 revised full papers presented were thoroughly reviewed and selected from 552 submissions they are devoted but not limited to robot motion planning and manipulation robot control cognitive robotics rehabilitation robotics health care and artificial limb robot learning robot vision human machine interaction mobile robotics micro nano mechanical systems manufacturing automation multi axis surface machining realworld applications

Advanced Technologies, Systems, and Applications

II Mirsad Hadžikadić, Samir Avdaković, 2018-01-30 This book presents innovative and interdisciplinary applications of advanced technologies It includes the scientific outcomes of the 9th DAYS OF BHAAAS Bosnian Herzegovinian American Academy of Arts and Sciences held in Banja Vru ica Tesli Bosnia and Herzegovina on May 25 28 2017 This unique book offers a comprehensive multidisciplinary and interdisciplinary overview of the latest developments in a broad section of technologies and methodologies viewed through the prism of applications in computing networking information technology robotics complex systems communications energy mechanical engineering economics and medicine to name just a few

Robot Technology and Applications : Proceedings, 1985 *Special Robot Technology* Tongying Guo, Hui Zhang, Lincang Zhu, 2023-05-23 This book focuses on the core technologies of special robots Both principles and engineering practice have been addressed This is achieved by providing an in depth study on several major topics such as the vision positioning of mobile robots the autonomous motion control of ruin search and rescue robots and typical applications of text questions and answers robots The autonomous motion control technologies of ruin search and rescue robots and typical applications of text questions and answers robots are the major features of the book The book benefits researchers engineers senior undergraduate students and postgraduate students in the fields of visual positioning path planning autonomous motion control and typical applications of special robots

Advanced Technologies, Systems, and Applications Mirsad Hadžikadić, Samir Avdaković, 2016-11-23 This volume spans a wide range of technical disciplines and technologies including complex systems biomedical engineering electrical engineering energy telecommunications mechanical engineering civil engineering and computer science The papers included in this volume were presented at the International Symposium on Innovative and Interdisciplinary Applications of Advanced Technologies IAT held in Neum Bosnia and Herzegovina on June 26 and 27 2016 This highly interdisciplinary volume is devoted to various aspects and types of systems Systems thinking is crucial for successfully building and understanding man made natural and social systems

Intelligent Robotics and Applications YongAn Huang, Hao Wu, Honghai Liu, Zhouping Yin, 2017-08-04 The three volume set LNAI 10462 LNAI 10463 and LNAI 10464 constitutes the refereed proceedings of the 10th International Conference on Intelligent Robotics and Applications ICIRA 2017 held in Wuhan China in August 2017 The 235 papers presented in the three volumes were carefully reviewed and selected from 310 submissions The papers in this third volume of the set are organized in topical sections on sensors and actuators mobile robotics and path planning virtual reality and artificial intelligence aerial and space robotics

mechatronics and intelligent manufacturing **New Technologies, Development and Application VII** Isak Karabegovic,Ahmed Kovačević,Sadko Mandzuka,2024-07-27 This book features papers focusing on the implementation of new and future technologies which were presented at the International Conference on New Technologies Development and Application Advanced Production Processes and Intelligent Systems held at the Academy of Science and Arts of Bosnia and Herzegovina in Sarajevo on 20-22 June 2024 It covers a wide range of future technologies and technical disciplines including complex systems such as Industry 4.0 robotics mechatronics systems automation manufacturing cyber physical and autonomous systems sensors networks control energy renewable energy sources automotive and biological systems vehicular networking and connected vehicles and intelligent transport effectiveness and logistics systems smart grids nonlinear systems power social and economic systems education and IoT The book **New Technologies Development and Application VII** is oriented toward Fourth Industrial Revolution Industry 4.0 which implementation will improve many aspects of human life in all segments and lead to changes in business paradigms and production models Further new business methods are emerging transforming production systems transport delivery and consumption which need to be monitored and implemented by every company involved in the global market **Advancing Automation and Robotics Technology for the Space Station Freedom and for the U.S. Economy** ,1993 **Medical Robot Technology** Jingang Jiang,Dianhao Wu,Yongde Zhang,Xuesong Dai,2024-11-28 This book mainly describes the basic principles basic knowledge and application of medical robots The book includes the characteristics and classification of the medical robot the key technology of medical robot and the engineering research of clinical application of medical robot While expounding the basic principles and knowledge this book pays attention to its clinical application research From the research background research significance key technologies and typical examples hospital service robot neurosurgery robot vascular intervention robots laparoscopic robot capsule robot prostate minimally invasive interventional robot and breast minimally invasive interventional robot orthopedic robot rehabilitation robot complete denture tooth arrangement robot orthodontic archwire bending robot and other medical robots are analyzed and described On this basis the development of medical robots is analyzed from the perspectives of policies and regulations market industry chain structure and technology This book is suitable for researchers senior undergraduate students and postgraduate students and industry practicing engineers in medical robots and biomedical engineering to consolidate the basic principles and knowledge and learn about the industry frontiers And it also is suitable for clinicians to understand relevant engineering practices **Robotics** Appuu Kuttan,2013-12-30 Robotics is an applied engineering science that has been referred to as a combination of machine tool technology and computer science It includes diverse fields such as machine design control theory microelectronics computer programming artificial intelligence human factors and production theory The present book provides a comprehensive introduction to robotics The book covers a fair amount of kinematics and dynamics of the robots It also covers the sensors and actuators used in robotics system This

book will be useful for mechanical electrical electronics and computer engineering students Key Features Latest technological developments in robotics Robotic classifications robot programming robotic sensors and actuators Kinematics and dynamic analysis of the Robot Modular systems in robotics Advances in Robotics systems Fuzzy logic control in Robotic systems Biped robot Bio mimetic robot Robot safety and layout Robot calibration Numerical examples Relative merits and demerits of different robot systems

Intelligent Control and Applications for Robotics, Volume II Yimin Zhou, Chen Qiao, Huiyu Zhou, 2023-11-22 Driven by sustaining demands from industrial automation space applications and the lack of labor forces robotics has received increasing attention from researchers in the field of automation and control Optimizing control schemes is critical to fully exploit the potential of industrial and daily use robots Usually accuracy and repeatability are measured to evaluate the performance of a robot and deviation of the two parameters from normal status would inevitably leads to positional error and creates a problem for the process Moreover the repeatability of a robot is different in various parts of the working envelope fluctuating with speed and payload Due to the inherent complexity an advanced learning methodology is crucial to the self learning and fast adaptation to disturbances

Technology Application in Aviation, Tourism and Hospitality Azizul Hassan, Nor Aida Abdul Rahman, 2022-10-22 This book covers multiple areas such as technology and the type of application in aviation tourism and hospitality with looking at current and future technology application as well as in a rural tourism perspective The strength of this book comes from the authors themselves coming from multiple higher institutions in Malaysia and Indonesia as these two countries are the top two countries in Southeast Asia with the world s most popular tourist destinations and for a reason a tropical climate rich culture gorgeous beaches wonderful food and low prices This book is also packed with detailed knowledge in the area of air travel as well as deep understanding on the related theories used as theoretical underpin in performing air travel research This book provides insightful discussion and very beneficial to the reader This book is suitable for the following readers general students travelers academics tourism consultants aviation regulators aviation practitioners and ministries of tourism Readers are also exposed to recent issues and development pertaining technology application in aviation tourism and hospitality theoretical discussion related to technology application as well as its application and future research application

2021 International Conference on Applications and Techniques in Cyber Intelligence Jemal Abawajy, Zheng Xu, Mohammed Atiquzzaman, Xiaolu Zhang, 2021-07-17 This book presents innovative ideas cutting edge findings and novel techniques methods and applications in a broad range of cybersecurity and cyberthreat intelligence areas As our society becomes smarter there is a corresponding need to secure our cyberfuture The book describes approaches and findings that are of interest to business professionals and governments seeking to secure our data and underpin infrastructures as well as to individual users

- 1 Highlights recent applications and techniques in cyber intelligence
