Space Tourism Michel van Pelt, 2005-03-09 Many scientific papers and popular articles have been written on the topic of space tourism describing everything from expected market sizes to the rules of 3 dimensional microgravity football But what would it actually feel like to be a tourist in space to be hurled into orbit on top of a controlled explosion to float around in a spacecraft and to be able to look down on your hometown from above the atmosphere Space tourism is not science fiction anymore Michel van Pelt tells us but merely a logical step in the evolution of space flight Space is about to be opened up to more and more people and the drive behind this is one of the most powerful economic forces tourism Van Pelt describes what recreational space travel might look like and explains the required space technology the medical issues astronaut training and the possibilities of holidays to destinations far far away This is a book for everyone who has ever dreamed of traveling to space a dream which according to van Pelt may not be so far from becoming a reality Consider it the armchair traveler's guide to the coming boom in space tourism

Spacecraft Michael H. Gorn, 2018-09-04 Spacecraft takes a long look at humankind's attempts and advances in leaving Earth through incredible illustrations and authoritatively written profiles on Sputnik the International Space Station and beyond In 1957 the world looked on with both uncertainty and amazement as the Soviet Union launched Sputnik 1 the first man made orbiter Sputnik 1 would spend three months circling Earth every 98 minutes and covering 71 million miles in the process The world's space programs have traveled far literally and figuratively since then and the spacecraft they have developed and deployed represent almost unthinkable advances for such a relatively short period This ambitiously illustrated aerospace history profiles and depicts spacecraft from Sputnik 1 through the International Space Station and everything in between including concepts that have yet to actually venture outside the Earth's atmosphere Illustrator and aerospace professional Giuseppe De Chiara teams up with aerospace historian Michael Gorn to

present a huge profusely illustrated and authoritatively written collection of profiles depicting and describing the design development and deployment of these manned and unmanned spacecraft Satellites capsules spaceplanes rockets and space stations are illustrated in multiple view sometimes cross section and in many cases shown in archival period photography to provide further historical context Dividing the book by era De Chiara and Gorn feature spacecraft not only from the United States and Soviet Union Russia but also from the European Space Agency and China The marvels examined in this volume include the rockets Energia Falcon 9 and VEGA the Hubble Space Telescope the Cassini space probe and the Mars rovers Opportunity and Curiosity Authoritatively written and profusely illustrated with more than 200 stunning artworks Spacecraft 100 Iconic Rockets Shuttles and Satellites That Put Us in Space is sure to become a definitive guide to the history of manned space exploration

**A Ball, a Dog, and a Monkey** Michael D'Antonio, 2007-09-18 A Ball a Dog and a Monkey tells the remarkable story of America's first efforts to succeed in space a time of exploding rockets national space mania Florida boomtowns and interservice rivalries so fierce that President Dwight Eisenhower had to referee them When the Soviet Union launched the first orbital satellite Sputnik I Americans panicked The Soviets had nuclear weapons the Cold War was underway and now the USSR had taken the lead in the space race Members of Congress and the press called for an all out effort to launch a satellite into orbit With dire warnings about national security in the news almost every day the armed services saw space as the new military frontier But President Eisenhower insisted that the space effort which relied on military technology be supervised by civilians so that the space race would be peaceful The Navy's Vanguard program flopped and the Army led by ex Nazi rocket scientist Wernher von Braun and a martinet general named J Bruce Medaris whom Eisenhower disliked took over Meanwhile the Soviets put a dog inside the next Sputnik and Americans grew more worried as the first animal in space whirled around the Earth Throughout 1958 America went space crazy UFO sightings spiked Boys from Brooklyn to Burbank shot model rockets into the air Space themed beauty pageants became a national phenomenon The news media flocked to the launchpads on the swampy Florida coast and reporters reinvented themselves as space correspondents And finally the Army's rocket program succeeded Determined not to be outdone by the Russians America's space scientists launched the first primate into space a small monkey they nicknamed Old Reliable for his calm demeanor And then at Christmastime Eisenhower authorized the launch of a secret satellite with a surprise aboard A Ball a Dog and a Monkey memorably recalls

the infancy of the space race a time when new technologies brought ominous danger but also gave us the ability to realize our dreams and reach for the stars      **Laika** Nick Abadzis, 2014-09-02 Eisner Award Winner Best Publication for Teens Eisner Award Nominee Best Reality Based Work Laika was the abandoned puppy destined to become Earth's first space traveler This graphic novel follows her journey Nick Abadzis masterfully blends fiction and fact in the intertwined stories of three compelling lives Along with Laika there is Korolev once a political prisoner now a driven engineer at the top of the Soviet Union's space program and Yelena the lab technician responsible for Laika's health and life This intense triangle is rendered with the pitch perfect emotionality of classics like *Because of Winn-Dixie* and *Shiloh* and Old Yeller Abadzis gives life to a pivotal moment in modern history casting light on the hidden moments of deep humanity behind history      **Apollo 11** Robert Godwin, 2002 Contains the entire crew of Apollo 11's personal observations upon returning to earth      **Choice**, 2002 *Journal of the British Interplanetary Society* British Interplanetary Society, 1999      *The Moon and Near-earth Objects* Pascale Ehrenfreund, Bernard H. Jahrhundert waren selbst profilierte Astronomen davon überzeugt dass unser Nachbarplanet von einer hochintelligenten zivilisierten Lebensform bevölkert ist Gegenwärtig diskutieren Wissenschaftler kontrovers darüber ob es Wasser und damit eine Lebensgrundlage unter der Marsoberfläche geben könnte      **Rockets and People: Volume III: Hot Days of the Cold War** Boris Chertok, 2013-04-30 In this third volume of a planned four volume set of memoirs the famous Russian spacecraft designer Boris Chertok who worked under the legendary Sergey Korolev continues his fascinating narrative on the early history of the Soviet space program from 1961 to 1967 arguably the peak of the effort Chertok devotes a significant portion of the volume to the early years of Soviet human space flight in the early 1960s These include a chapter on the Vostok and Voskhod programs which left an indelible mark on early years of the space race a lengthy meditation on the origins and early missions of the Soyuz space program the flight and death of cosmonaut Vladimir Komarov during the very first piloted Soyuz flight in 1967 Additional chapters cover robotic programs such as the Molniya communications satellite system the Zenit spy satellite program and the Luna series of probes that culminated in the world's first survivable landing of a probe on the surface of the Moon Chertok also devotes several chapters to the development of early generations of Soviet intercontinental ballistic missiles and missile defense systems Chertok's chapter on the Cuban Missile Crisis provides a radically unique perspective on the crisis from the point of view of those who would have been responsible for unleashing nuclear Armageddon in 1962 had Kennedy and Khrushchev not been able to agree on a stalemate Two further chapters cover the untimely deaths of the most important luminaries of the era Sergey Korolev and Yuriy Gagarin Finally historians of Soviet science will find much of the interest in the concluding chapter focused on the relationship between the space program and the Soviet Academy of Sciences NASA SP 2009 4110      **Rockets and People: Hot days of the Cold**

**War** Boris Evseevich Chertok, 2005 Covers the history of the Soviet space program from 1961 to 1967      **Rockets and People** Boris Chertok, 2005-01-01 Much has been written in the West on the history of the Soviet space program but few Westerners have read direct first hand accounts of the men and women who were behind the many Russian accomplishments in exploring space The memoirs of Academician Boris Chertok translated from the original Russian fills that gap Chertok began his career as an electrician in 1930 at an aviation factory near Moscow Twenty seven years later he became deputy to the founding figure of the Soviet space program the mysterious Chief Designer Sergey Korolev Chertok s sixty year long career and the many successes and failures of the Soviet space program constitute the core of his memoirs **Rockets and People** In these writings spread over four volumes Academician Chertok not only describes and remembers but also elicits and extracts profound insights from an epic story about a society s quest to explore the cosmos In Volume 1 Chertok describes his early years as an engineer and ends with the mission to Germany after the end of World War II when the Soviets captured Nazi missile technology and expertise Volume 2 takes up the story with the development of the world s first intercontinental ballistic missile ICBM and ends with the launch of Sputnik and the early Moon probes In Volume 3 Chertok recollects the great successes of the Soviet space program in the 1960s including the launch of the world s first space voyager Yuriy Gagarin as well as many events connected with the Cold War Finally in Volume 4 Chertok meditates at length on the massive Soviet lunar project designed to beat the Americans to the Moon in the 1960s ending with his remembrances of the Energiya Buran project
