Crystal Identification with the Polarizing Microscope R.E. Stoiber, S.A. Morse, 2012-12-06 Some of the simpler measurements of optical mineralogy are so precise and powerful that they give satisfaction to beginning students Not long after mastering the strike and dip of rock surfaces with the Brunton compass many geology students are able to determine precisely the identity of quartz or the anorthite content of plagioclase or the magnesian ratio of pyroxene with the polarizing or petrographic microscope by means of measuring refractive index to better than one part in a thousand Very little training and almost no theory are needed to achieve these skills But there inevitably comes a time when theory is needed either to get on with the art or simply to reconstruct from first principles what is going on when rote memory fails In this book we hope to provide both the rote methods and the theoretical background for practitioners at all levels of experience We draw from several careers ours our colleagues and our students in teaching the subject at various levels of sophistication Our book is intended to serve the needs of industrial and forensic scientists as well as petrographers who deal with rocks Much of our treatment is based on new research both in matters of presentation and in the optical determination of minerals and other materials *Calendar of the University of Manitoba ...* --. University of Manitoba, 1915 *Knowledge and Skills in Identification and Gambling of Jade: The Most Comprehensive Handbook* James Leong, The book is a collection of detailed knowledge and skills on the identification evaluation and gambling of jade raw stones The book is about 300 000 words and can be regarded as an encyclopedia on the evaluation of jade raw materials **Walch Science Literacy** Richard Ojakangas, 1997 Explores key concepts including rocks and minerals continental drift volcanoes earthquakes and more Builds critical thinking skills Promotes concept understanding among all students especially those who read below grade level See other Walch Science Literacy titles **The Quarrying Industry of Missouri** Ernest Robertson Buckley, Henry Andrew Buehler, 1904 [Geology and Mineral Resources](#) R.
