Rockshelters Of Southwestern Connecticut Their Prehistoric Occupation And Use:

Rockshelters of Southwestern Connecticut Ernest A. Wiegand, 1983 *Connecticut's Indigenous Peoples* Lucianne Lavin, 2013-06-25

More than 10 000 years ago people settled on lands that now lie within the boundaries of the state of Connecticut. Leaving no written records and scarce archaeological remains, these peoples and their communities have remained unknown to all but a few archaeologists and other scholars. This pioneering book is the first to provide a full account of Connecticut's indigenous peoples from the long ago days of their arrival to the present day.

Lucianne Lavin draws on exciting new archaeological and ethnographic discoveries, interviews with Native Americans, rare documents including periodicals, archaeological reports, master's theses and doctoral dissertations, conference papers, newspapers and government records, as well as her own ongoing archaeological and documentary research. She creates a fascinating and remarkably detailed portrait of indigenous peoples in deep historic times, before European contact, and of their changing lives during the past 400 years of colonial and state history. She also includes a short study of Native Americans in Connecticut in the twentieth and twenty-first centuries. This book brings to light the richness and diversity of Connecticut's indigenous histories, corrects misinformation about the vanishing Connecticut Indian, and reveals the significant roles and contributions of Native Americans to modern-day Connecticut.

Bulletin of the Archaeological Society of Connecticut Archaeological Society of Connecticut, 2009 **Prehistory of Connecticut's Native Americans** Lucianne Lavin, 1985 **Hunter-Gatherer Archaeobotany** Sarah L.R. Mason, 2016-09-17

Hunter-Gatherer Archaeobotany shows how archaeobotanical investigations can broaden our understanding of the much wider range of plants that have been of use to people in the recent and more distant past. The book comprises sixteen papers covering aspects of the archaeobotany of wild plants ranging across the northern hemisphere from Japan across America, Europe, and into the Near East. Sites examined span the Upper Palaeolithic to the recent past and demonstrate how such studies can extend our understanding of human interaction with plants throughout our history.

Connecticut, a Bibliography of Its History Committee for a New England Bibliography, 1986 **The Bulletin and Journal of Archaeology for New York State**, 1985 **Bulletin** New York State Museum, 1976 **Archaeological Resources of Southwestern Colorado**, 1982 *Archaeological Investigation of Cape Addington Rockshelter* Madonna Moss, 2004 *Prehistoric Culture Change on the Colorado Plateau* Shirley Powell, Francis E. Smiley, 2016-02

A collection of writings by participants in the Black Mesa Archaeological Project offers a synthesis of Kayenta area archaeology, examining the ancestral Puebloan and Navajo occupation of the Four Corners region and analysing faunal, lithic, ceramic, chronometric, and human osteological data to construct an account of the prehistory and ethnohistory of northern Arizona that demonstrates how organizational variation and other aspects of culture change are largely a response to a changing natural environment.

Practices of Archaeological Stratigraphy Edward C. Harris, 2014-06-28 *Practices of Archaeological Stratigraphy* brings together a number of examples which illustrate the development and use of the Harris Matrix in describing and interpreting archaeological sites This matrix the theory of which is described in two editions of the previous book by Harris *Principles of Archaeological Stratigraphy* made possible for the first time a simple diagrammatic representation of the stratigraphic sequence of a site no matter how complex The Harris Matrix by showing in one diagram all three linear dimensions plus time represents a quantum leap over the older methods which relied on sample sections only In this book 17 essays present a sample of new work demonstrating the strengths and uses of the Harris Matrix the first ever published collection of papers devoted solely to stratigraphy in archaeology The crucial relationships between the Harris methods open area excavation techniques the interpretation of interfaces and the use of single context plans and recording sheets is clarified by reference to specific sites These sites range from medieval Europe through Mayan civilizations to Colonial Williamsburg Virginia This book will be of great value to all those involved in excavating and recording archaeological sites and should help to ensure that the maximum amount of stratigraphic information can be gathered from future investigations Presents case studies which illuminate the Harris matrix method invented by Edward C Harris Senior editor is the inventor of this method and principle in the field Serves as a companion volume to Harris s *Principles of Archaeological Stratigraphy*
