and development Despite increased Chinese investments in transport energy communications and manufacturing sub Saharan Africa is yet to see tangible economic and development benefits according to the multidimensional Productive Capacities Index PCI External trade is dogged by the same problems as during the colonial era with primary commodities dominating exports to China and industrial or manufacturing products dominating imports thereby leaving the region exposed to external economic shocks The book considers whether there are lessons to be learned from the experience of Asian countries such as Vietnam proposing pragmatic coordinated non ideological and non confrontational policy approaches to development This book will be of interest to researchers policymakers advisors academics and practitioners with an interest in development in Africa and China s increasing role in the continent **Wild Sardinia** Tracey
