Secure Communications And Asymmetric Cryptosystems Aas Selected Symposium Volume 69:

An Introduction to Mathematical Cryptography Jeffrey Hoffstein, Jill Pipher, Joseph H. Silverman, 2014-09-11 This self contained introduction to modern cryptography emphasizes the mathematics behind the theory of public key cryptosystems and digital signature schemes The book focuses on these key topics while developing the mathematical tools needed for the construction and security analysis of diverse cryptosystems Only basic linear algebra is required of the reader techniques from algebra number theory and probability are introduced and developed as required This text provides an ideal introduction for mathematics and computer science students to the mathematical foundations of modern cryptography The book includes an extensive bibliography and index supplementary materials are available online The book covers a variety of topics that are considered central to mathematical cryptography Key topics include classical cryptographic constructions such as Diffie Hellmann key exchange discrete logarithm based cryptosystems the RSA cryptosystem and digital signatures fundamental mathematical tools for cryptography including primality testing factorization algorithms probability theory information theory and collision algorithms an in depth treatment of important cryptographic innovations such as elliptic curves elliptic curve and pairing based cryptography lattices lattice based cryptography and the NTRU cryptosystem The second edition of An Introduction to Mathematical Cryptography includes a significant revision of the material on digital signatures including an earlier introduction to RSA Elgamal and DSA signatures and new material on lattice based signatures and rejection sampling Many sections have been rewritten or expanded for clarity especially in the chapters on information theory elliptic curves and lattices and the chapter of additional topics has been expanded to include sections on digital cash and homomorphic encryption Numerous new exercises have been included **Advances in Cryptology — CRYPTO '93** Douglas R. Stinson, 2003-05-15 The CRYPTO 93 conference was sponsored by the International Association for Cryptologic Research IACR and Bell Northern Research a subsidiary of Northern Telecom in co operation with the IEEE Computer Society Technical Committee It took place at the University of California Santa Barbara from August 22 26 1993 This was the thirteenth annual CRYPTO conference all of which have been held at UCSB The conference was very enjoyable and ran very of the General Chair Paul Van Oorschot smoothly largely due to the efforts It was a pleasure working with Paul throughout the months leading up to the conference There were 136 submitted papers which were considered by the Program Committee Of these 38 were selected for presentation at the conference There was also one invited talk at the conference presented by Miles Smid the title of which was A Status Report On the Federal Government Key Escrow System The conference also included the customary Rump Session which was presided over by Whit Diffie in his usual inimitable fashion Thanks again to Whit for organizing and running the Rump session This year the Rump Session included an interesting and lively panel discussion on issues pertaining to key escrowing Those taking part were W Diffie J Gilmore S Goldwasser M Hellman A Herzberg S Micali R Rueppel G Simmons and D Weitzner **Privacy on the Line, updated and expanded**

edition Whitfield Diffie, Susan Landau, 2010-02-26 A penetrating and insightful study of privacy and security in telecommunications for a post 9 11 post Patriot Act world Telecommunication has never been perfectly secure The Cold War culture of recording devices in telephone receivers and bugged embassy offices has been succeeded by a post 9 11 world of NSA wiretaps and demands for data retention Although the 1990s battle for individual and commercial freedom to use cryptography was won growth in the use of cryptography has been slow Meanwhile regulations requiring that the computer and communication industries build spying into their systems for government convenience have increased rapidly The application of the 1994 Communications Assistance for Law Enforcement Act has expanded beyond the intent of Congress to apply to voice over Internet Protocol VoIP and other modern data services attempts are being made to require ISPs to retain their data for years in case the government wants it and data mining techniques developed for commercial marketing applications are being applied to widespread surveillance of the population In Privacy on the Line Whitfield Diffie and Susan Landau strip away the hype surrounding the policy debate over privacy to examine the national security law enforcement commercial and civil liberties issues They discuss the social function of privacy how it underlies a democratic society and what happens when it is lost This updated and expanded edition revises their original and prescient discussions of both policy and technology in light of recent controversies over NSA spying and other government threats to communications privacy
