Carbonneau,2011-01-01 The chapters of this volume represent the majority of Professor Carbonneau s scholarly writings on the subject of international commercial arbitration They reflect his interest over the course of thirty years of law teaching in international litigation comparative law and of course international arbitration Some of the chapters are of a recent vintage while others were written a decade or two ago Whatever their date of production the chapters have a continuing professional interest Each addresses some of the major issues of trans border arbitration law A number of chapters emphasize the importance of courts in developing and maintaining a legal culture that is hospitable to arbitration The work of the courts has been instrumental to the reception of arbitration in the United States and in several European jurisdictions The courts can make or break arbitration by upholding arbitration agreements and enforcing arbitral awards Other chapters underscore that arbitration can operate as a complete legal system It not only provides workable trial procedures but arbitrators can also create law in their rulings With the addition of an internal arbitral appellate mechanism arbitrations can function with almost absolute independence The world law on arbitrations seems to favor the a national and a juridical operation of the arbitral process A few of the chapters recognize that arbitration is being increasingly employed to resolve political or mixed political and commercial disputes Investment arbitration and BITs are the most recent expression of this development it had been apparent in WTO and NAFTA dispute resolution The Iran U S Claims Tribunal presented the first great occasion for assessing the vocation of arbitration in a mixed dispute situation While arbitration has made significant inroads in this area political sovereignty remains resistant to the imposition of limitations In many less visible political cases determinations are nonetheless made and rendered enforceable The concluding chapters address more specific developments in the field of ICA

A number of cases point to the strong perhaps overweening support of the judiciary for arbitration. The courts in some jurisdictions support arbitration unequivocally and are bent upon a single outcome no matter the impact on doctrine. Lawyer presence in the arbitral process has led to increased formalization in some proceedings. The judicialization of arbitration tilts the process toward the protection of rights and hinders its ability to function effectively and reach finality. Lawyers can readily misunderstand and undermine the gravamen of arbitration. The concluding chapters also establish that the UK Arbitration Act 1996 is one of the world's outstanding arbitration statutes. It rivals and bests the UNCITRAL Model Law on ICA and is the equal of the French codified law on arbitration. Finally, the express text of the New York Arbitration Convention appears to have been altered significantly by court practice. The possible limitations of national law have been neutralized and the provisions of the Convention articulate a truly trans-border regulation of the enforcement of awards. In sum, the chapters in this book reflect the author's lifetime work in the area of international arbitration and are required reading for all those practicing in the field: law students, arbitrators, academics, and practicing lawyers.

International Arbitration in the 21st Century: Toward "Judicialization" and Conformity? Charles N. Brower, Richard B. Lillich, 2023-10-09. Is international arbitration becoming too judicial and conformist? This important book addresses this issue with detailed attention to the arbitral procedure, the law applicable to the dispute being arbitrated, and the review of awards. The authors include members of various international tribunals, leading lawyers, and distinguished academics from the United States and abroad. Published under the Transnational Publishers imprint.

Compulsory Arbitration Richard A. Bales, 2019-06-07. This is the first book on a crucial issue in human resource management. In recent years, employers have begun to require as a condition of employment that their nonunion employees agree to arbitrate rather than litigate any employment disputes, including claims of discrimination. As the number of employers considering such a requirement soars, so does the fear that compulsory arbitration may eviscerate the statutory rights of employees. Richard A. Bales explains that the advantages of arbitration are clear. Much faster and less expensive than litigation, arbitration provides a forum for the many employees who are shut out of the current litigative system by the cost and by the tremendous backlog of cases. On the other hand, employers could use arbitration abusively. Bales views the current situation as an ongoing experiment. As long as the courts continue to enforce agreements that are fundamentally fair to employees, the experiment will continue. After tracing the history of employment arbitration in the nonunion sector, Bales explains how employment arbitration has actually worked in the securities industry and at Brown Root, a company with a comprehensive dispute resolution process. He concludes by summarizing the advantages, disadvantages, and policy implications of adopting arbitration as the preeminent method of resolving disputes in the American workforce.
