to Intercultural Economics Rongxing Guo, 2012-04-23 This book presents a methodological framework for the analysis of intercultural issues frequently misinterpreted by existing theories It uses a challenge and response theory of cultural development to examine the relationship between different natural disasters and threats and the developments of ancient civilizations The spatial interaction of ancient civilizations is assessed and four non linear patterns of intercultural dynamics are presented Our empirical analyses of the four major ancient civilizations the Mesopotamian the Egyptian the Indus and the Chinese focus on intercultural influences as well as how they have shaped the spatial dynamics of the world as a whole This book also examines various aspects of intercultural economic influences such as those of culture on international trade Evidence from a broad panel of nations supports the presumption that high income trade partners will be less sensitive to the measures of cultural dissimilarity than low income trade partners between which cultural dissimilarity leads to barriers to international trade The treatment of linguistic and religious factors as continuous variables in this book has improved past studies in which language was treated as one or more dummy variables and religion was ignored Infrastructure and the

Space-Economy Karin Peschel, 2012-12-06 This Festschrift is dedicated to ROLF FUNCK on occasion of his 60th birthday on February 7 1990 It was a wholehearted desire of the authors who all are obliged to ROLF FUNCK in their research work to please and to honour him and to express their deep gratitude I gladly took the initiative of preparing this Festschrift since I have been closely associated with ROLF FUNCK for many years of his academic life We first met in 1958 when he was Assistant Professor Wissenschaftlicher Assistent and I was student at the University of Munster A few years later when ROLF FUNCK still very young moved to the University of Karlsruhe as Professor of Economics and Director of the Institute of Economic Policy and Research he offered me the opportunity of working with him and this started a long period of successful scientific collaboration Nowadays we meet only occasionally at conferences in committees etc but I always recall with pleasure the warm hearted and stimulating atmosphere he created at his Institute in Karlsruhe I express my thanks to the authors and to the publisher the Springer Verlag for their cooperation as well as to the sponsors who provided the necessary

funds for the publication of this Festschrift For her enthusiasm in compiling and processing the articles on the PC and producing the final draft I am indebted to Mrs Ilona Lohr Selected Papers from the Workshop in Research Methods for Directors of University Business and Economic Research Robert Ferber,1961 *Open Economics* Richard Arena,Sheila Dow,Matthias Klaes,2009-06-02 This book offers an up to date assessment of economics in relation to other disciplines combining the work of leading international scholars and rising young stars and presenting an historical introduction to the disciplinary context of economics **Catalogue of Periodicals and Continuations** ,1991 **Cultural Influences on Economic Analysis** R. Guo,2006-10-10 This book examines the influences of various cultural factors on economic analyses that could be misrepresented by existing economic theories Most significantly the book measures the cultural diversity and bilateral similarity indexes of the existing 200 or more countries and regions and quantifies their impacts on economic activities Selected Reading in Quantitative Urban Analysis Samuel J. Bernstein,W. Giles Mellon,2013-10-22 Selected Readings in Quantitative Urban Analysis focuses on the use of quantitative approaches in analyzing urban problems The areas discussed are overall urban models urban models dealing with the basic economic factors of urban life workers and jobs housing and transportation urban models dealing with the provision of basic services education health care fire police water and sanitation urban models dealing with the provision of the luxuries of urban life theater ballet symphony urban models dealing with how the decisions to provide these factors are made policy formulation and the resolution of conflicting priorities This book is comprised of 11 chapters and begins with an outline of the major areas of urban life analyzed in a quantitative manner Urban modeling is then introduced and problems and pitfalls in urban model building are considered The next section looks at the economic base of urban life with emphasis on labor markets and labor force urban housing markets and housing policy and policy and policy models in transportation Subsequent chapters explore essential urban services including public education community health services fire protection sanitation and emergency medical services The remaining sections discuss the amenities of urban life and urban politics and policy This monograph should be useful to urban administrators and planners as well as students interested in urban problems **The Economic Thought of William Petty** Hugh Goodacre,2018-05-11 William Petty 1623 1687 long recognised as a founding father of English political economy was actively involved in the military colonial administration of Ireland following its invasion by Oliver Cromwell and to the end of his days continued to devise schemes for securing England s continued domination of that country It was in that context that he elaborated his economic ideas which consequently reflect the world of military bureaucratic officialdom neo feudalism and colonialism he served This book shows that much of the theory and methodology in use within the economics discipline of today has its roots in the writings of Petty and his contemporaries rather than in the supposedly universalistic and enlightened ideals of Adam Smith a century later Many of the fundamental ideas of today s development economics for example are shown to have been deployed by Petty explicitly for the purpose of furthering England s colonialist objectives

while his pioneering writings on fiscal issues and national accounting theory were equally explicitly directed towards the raising of funds for England's predatory colonial and commercial wars This book argues that exploring the historical roots of economic ideas and methods in this way is an essential aspect of assessing their appropriateness and analytical power today and that this is more relevant than ever It will be of interest to advanced students and researchers in the history of economic thought early modern economic history development economics and economic geography *The Wiley-Blackwell*

Anderton, 2014-06-28 The subject of peace economics and its ramifications are comprehensively and deeply attacked in this book First of all the book presents a compact survey of significant contributions already made and then it provides a broad theoretical background for examining the subject by evaluating four different approaches those of 1 neoclassical welfare theory 2 Keynesian and modern versions of macroeconomics 3 modern growth theory and 4 political choice theory A number of contributions deal with major questions on issues such as the impact of military cutbacks in the Eastern European economies upon their growth trade between nations arms trade nuclear defense and the benefits and costs of war as highlighted by the recent Gulf War Issues of a more general nature but equally significant are also discussed including the age old negotiations problem of two mature political leaders of major powers in conflict the determinants of military expenditures and the problems of developing countries In the last chapter the findings of the studies reported in the book are summarized and key directions for further research are identified This book is indispensable for any economist or analyst conducting research on peace economics and the peace process or concerned with the impacts of recent arms reduction and conversion by the major powers and the escalation of military expenditures elsewhere **Fifty Years of Regional Science**
