Teaching

Buddhism Todd Lewis, Gary Delaney DeAngelis, 2017 Buddhist studies is a rapidly changing field of research constantly transforming and adapting to new scholarship. This creates a problem for instructors both in a university setting and in monastic schools as they try to develop a curriculum based on a body of scholarship that continually shifts in focus and expands to new areas. Teaching Buddhism establishes a dialogue between the community of instructors of Buddhism and leading scholars in the field who are updating, revising, and correcting earlier understandings of Buddhist traditions. Each chapter presents new ideas within a particular theme of Buddhist studies and explores how courses can be enhanced with these insights. Contributors in the first section focus on the typical approaches, figures, and traditions in undergraduate courses such as the role of philosophy in Buddhism, Nagarjuna, Yogacara, Buddhism, tantric traditions, and Zen Buddhism. They describe the impact of recent developments like new studies in the cognitive sciences on scholarship in those areas. Part Two examines how political engagement and ritual practice have shaped the tradition throughout its history. Focus then shifts to the issues facing instructors of Buddhism: dilemmas for the scholar-practitioner in the academic and monastic classroom, the tradition's possible roles in teaching feminism and diversity, and how to present the tradition in the context of a world religions course. In the final section, contributors offer stories of their own experiences teaching, paying particular attention to the ways in which American culture has impacted them. They discuss the development of courses on American Buddhism using course material on the family and children, the history and trajectory of a Buddhist-Christian dialog, and Buddhist bioethics, environmentalism, economic development, and social justice. In synthesizing this vast and varied body of research, the contributors in this volume have provided an invaluable service to the field.

How Soka Gakkai Became a Global Buddhist Movement Daniel Alfred Metraux, 2010 The Soka Gakkai is a massive Japan-based New Religious Movement based on the Buddhist teachings of the medieval Buddhist monk Nichiren. This work examines Soka Gakkai International chapters in Australia, Southeast Asia, Cambodia, the Philippines, and Quebec to determine why the movement has developed strong roots among people from widely divergent cultures. Religions of the United States in Practice Colleen McDannell, 2001-11-18 Religions of the United States in Practice is a rich anthology of primary sources with accompanying essays that examines religious behavior in America. From praying in an early American synagogue to performing Mormon healing rituals to debating cremation, Volume 2 explores faith through action in the nineteenth and twentieth centuries. The documents and essays consider the religious practices of average people praying, singing, healing, teaching, imagining, and persuading. Some documents are formal liturgies, while other texts describe more spontaneous religious actions. Because religious practices also take place in the imagination, dreams, visions, and fictional accounts are also included. Accompanying each primary document is an essay that sets the religious practice in its historical and theological context, making this volume ideal for classroom use and accessible to any reader. The introductory essays explain the various meanings of religious practices as lived out in churches and synagogues, in parlors and fields, beside rivers.
