Gabbard, 2000-04-01 Passionate feelings of love and hate are stirred in psychotherapy Paradoxically these passions may either undermine the therapist catastrophically or serve as the crucible in which profound understanding is forged Transferences and countertransferences of love and hate occur on a spectrum that includes unobjectionable negative and positive feelings relatively benign forms of love and hate and more malignant intractable versions of love and hate that present formidable challenges to the therapist Each of these variations is explored in different chapters of this book Gender configurations gender fluidity adolescent transferences the link between love and lust and passive forms of hating are among the topics discussed Most of all the author noted psychoanalyst Glen Gabbard depicts what it is like to be in the eye of the hurricane when passions are aroused He provides a practical yet theoretically sophisticated guide to the management of love and hate as they are experienced by both patient and therapist **Love and Hate** David Mann, 2013-11-12 Love and hate seem to be the dominant emotions that make the world go round and are a central theme in psychotherapy Love and Hate seeks to answer some important questions about these all consuming passions Many patients seeking psychotherapy feel unlovable or full of rage and hate What is it that interferes with the capacity to experience love This book explores the origins of love and hate from infancy and how they develop through the life cycle It brings together contemporary views about clinical practice on how psychotherapists and analysts work with and think about love and hate in the transference and countertransference and explores how different schools of thought deal with the subject David Mann together with an impressive array of international contributors represent a broad spectrum of psychoanalytic perspectives including Kleinian Jungian Independent Group and Lacanian psychotherapists psychoanalysts and analytical psychologists With emphasis on clinical illustration throughout the writers show how different psychoanalytic schools think about and clinically work with the experience and passions of love and hate It will be invaluable to practitioners and students of psychotherapy psychoanalysis analytical psychology and counselling **Contemporary Psychoanalysis in America** Arnold M. Psychoanalytic Collisions Joyce Anne Slochower, 2013-05-13 In this beautiful work of reflection and self reflection Joyce Slochower wrestles with a seldom acknowledged dimension of being a psychoanalyst the dialectic between illusions and less ideal realities that complicate the analyst's sense of who she is and of how best to meet her clinical obligations Psychoanalytic Collisions details the various ways in which the analyst's wishes both professional and personal collide with the less than perfect actualities of everyday clinical work The collisions in question are often rooted in the analyst's own illusions illusions of therapeutic possibility in the face of ordinary human existence or illusions of therapeutic selflessness in the face of one's own immutably self centered humanity Such collisions may complicate nonclinical professional activities such as writing in which the analyst's desire to develop a personal idiom collides with self doubt and the imagined rebuff of teachers and colleagues Other collisions coalesce dyadically in the consulting room They may reflect sharp dissonance between what the patient needs the analyst to feel and what the latter actually feels as in discrepant experiences of erotic desire They may grow out of colliding idealizations of analyst and patient each of the other And they may arise in the wake of traumatizing life events that destroy the shared illusions on which treatment has rested In finely wrought examinations of these eventualities Slochower is guided by the belief that collisions are intrinsic both to forging an analytic identity and to practicing in a manner consonant with that identity Psychoanalytic collisions she enjoins often cannot be resolved but they can usually be productively engaged And the very act of engagement be it establishing new grounds for collaboration in the wake of real world catastrophe or wrestling with clinical impasse grounded in the radically divergent expectations of analyst and patient or owning up to what Slochower terms secret delinquencies can provide the basis for a vision of the good enough analyst in which therapeutic hopefulness coexists with acceptance of the analyst's all too human fallibility

Hate and Love in Psychoanalytical Institutions Jurgen Reeder, 2020-10-13 In Hate and Love in Psychoanalytic Institutions Jurgen Reeder investigates the professional superego of the psychoanalyst This superego designates a prescriptive and prohibiting role that the individual must play within the parameters of a certain occupational sphere The prescriptive aspect works like a professional ideal and in this respect the superego can be said to sustain a professional ethos or spirit commanding what the professional should know and what his or her relations to clients and colleagues should resemble It helps to bind the members of the analytical community together The prohibiting aspect installs a vigilant inner eye It offers necessary protection against detrimental aberrations but it also evokes fantasies of critical or condemning colleagues who might have insight into what transpires within the walls of the analyst's own private practice leading to a reluctance to communicate openly about the analytical experience In this sense the professional superego contributes to the paranoization of collegial communication a circumstance that has a hampering effect on spontaneity and creativity in both clinical and theoretical work Jurgen Reeder's groundbreaking research uncovering the dynamics of the

professional superego in psychology psychotherapy and psychoanalysis can be applied to other professions as well including social work medicine education law and the ministry **Shadow of the Other** Jessica Benjamin,2013-10-31 Shadow of the Other is a discussion of how the individual has two sorts of relationships with an other other beings other individuals The first regards the other as an entirely different being from oneself but one which is still recognizable The second understands and recognizes this other by its function as a repository of characteristics cast from oneself In recognizing how this dual relationship is reconciled within the self and its implications in male female relations Jessica Benjamin continues her exploration of intersubjectivity and gender taking up questions of contemporary debates in feminist theory and psychoanalysis

Moving Beyond the Comfort Zone in Psychotherapy Nancy A. Bridges,2005 Making emotional contact and inviting patients to use therapeutic relationships for their relational and developmental aims is a risky and intimate proposition But as the author of this book argues therapists must be willing to engage deeply with patients to work from within the relationship extending the therapeutic relationship to reach the private experience of self and other and offer new relational experience Moving beyond traditional thinking the author presents a relational approach that integrates psychoanalytic thinking with the latest findings from infant research to give therapists the theoretical framework to orient the treatment and maintain psychic equilibrium and safety during times of arousing and destabilizing affect and relational scenarios A therapeutic stance which is fluid and open to intrapsychic and interpersonal influence allows for the experience and elaboration of complex unconscious affects and shifting points of identification Compelling clinical narratives bring the reader into the consulting room and show how the therapist may forge deep emotional connection within a bounded therapeutic relationship that relies upon mutual influence and self revelation and opens up relational space to ultimately rearrange a patient's experience of self and other *Miss-ing* Bruce Fink,2024-05-28 A collection of essays and penes from a noted psychoanalyst and Lacanian thinker Inspired by Jacques Lacan's idea in his Seminar VI that Human beings cannot help but consider themselves to be missing something this series of essays explores the idea of lack under multiple themes

Many Voices Pamela Cooper-White, 2006-11 This book is a full scale disciplinary framework for pastoral psychotherapists pastoral counselors at intermediate and advanced levels of clinical training and also for experienced pastoral counselors and psychotherapists in professional practice It harvests the great potential of postmodern sensibilities to help accompany and support individuals couples and families in recognizing and healing especially painful psychic wounds and or longstanding patterns of self defeating relationships to self and others Pamela Cooper White s widely praised work which has always integrated cutting edge notions from the social sciences into pastoral therapy here takes a distinctive and promising turn toward the relational and the theological Pastoral psychotherapy she argues needs to find its framework in a strongly relational idea of the person God and health Illustrated throughout by four key case studies Cooper White shows in Part 1 how multiplicity and relationality provide a dynamic and exciting way of viewing human potential and pain In Part 2 she unfolds the practical applications of this paradigm for a strongly empathic therapeutic relationship and process

Setting Out Lesley Murdin, Meg Errington, 2005 The outcome of therapy is always to some extent determined by success of the initial session In *Setting Out* the issues surrounding this subject are explored providing valuable insights into the significance of beginnings in psychotherapy Winnicott's Children Ann Horne, Monica Lanyado, 2013-03-05 Winnicott s *Children* focuses on the use we make of the thinking and writing of DW Winnicott how this has enhanced our understanding of children and the settings where we work and how it has influenced the way in which we do that work It is a volume by clinicians concerned about how as well as why we engage with particular children in particular ways The book begins with a scholarly and accessible exposition of the place of Winnicott in his time in relation to his contemporaries Melanie Klein Anna Freud John Bowlby and the development of his thinking The dual focus on the earliest experience of the infant and its consequences plus the how of engaging with children as good enough mothers or good enough therapists is picked up in the chapters that follow The role of play is central to a chapter on supervision struggling through the doldrums can be part of the adolescent s experience and that of those who engage with him the role of psychotherapy in a Winnicottian therapeutic community and an inner city secondary school is explored and a chapter on radio work links us personally with Winnicott and his desire to talk plainly and helpfully to parents There is a richness in the collection of subjects in this book and in the experience of the writers It will appeal to those who work with children in child and family mental health settings schools hospitals colleges and social care settings *Love and Loss in Life and in Treatment* Linda B. Sherby, 2013-07-18 The focus of *Love and Loss* is how patients and therapists experiences of love and loss in life and treatment room intermingle and interact **The Good Life** Jeffrey B. Rubin, 2012-02-01 Psychoanalysts have traditionally been expert at uncovering what afflicts and damages people argues Jeffrey B Rubin but by focusing on narcissism and perversions depression and sadism psychoanalysis has all too often disregarded what nourishes and sustains us In *The Good Life* he demonstrates how psychoanalysis can make a profound contribution to the well lived life by drawing on a neglected but potent aspect of

psychoanalysis its capacity to illuminate a psychology of health as well as illness Rubin shows that at its best psychoanalysis can highlight both the ingredients of love ethics creativity and spirituality as well as the obstacles to experiencing them Exploring the good life from this dual perspective provides an indispensable resource for helping us live with greater meaning and vitality *Love and Death in Psychotherapy* Robert Langs, 2006-06-23 Feelings of love between patients and their therapists have been an endless source of confusion for those involved An essential reading for all counselling and psychotherapy students and practitioners this text offers fresh perspectives and advice on how best to deal with expressions of love and sexual desires in the course of therapy **The Misuse of Persons** Stanley J. Coen, 2013-11-26 In this major contribution to contemporary psychoanalysis Stanley Coen illuminates a heretofore undescribed character structure especially resistant to analytic process Pathologically dependent patients for Coen are identified not by surface character traits but by their response to the intrapsychic demands of analysis Such patients remain in treatment sometimes contentedly sometimes amid rebukes and complaints but they do not profit from it Their inability to use insight especially in the transference is matched by a proclivity for sadomasochistic enmeshment In analysis this tendency translates into a continuing dependent attachment to the analyst In exploring the genetic roots of pathological dependency Coen ranges beyond extant trauma theories in describing a pattern of parent child interaction in which repetitive behavioral enactments substitute for the acceptance and resolution of conflicts both intrapsychic and interpersonal In analysis pathologically dependent patients use the analyst as they have come to use significant others throughout their lives as part of a defensive structure characterized by repetitive enactments and a refusal to face what is wrong with them This misuse of others is infused with destructiveness hostility and rage and the analyst necessarily becomes the object of these powerful emotions With such patients then the road to therapeutic progress invariably passes through the analysis of mutual transferential and countertransferential hate the patient's tempting invitations to collusion and avoidance notwithstanding **The Art of Flourishing** Jeffrey B. Rubin, 2011 Blends principles in meditation and psychotherapy in a guide that counsels readers on how to balance self care with care for others explaining how to foster healthier and more fulfilling relationships by appropriately addressing personal needs
