

TWO STANDARD WORKS FOR SEAFARERS

The Ship's Compass

G. A. A. GRANT and J. KLINKERT

Including General Magnetism; Theory, Practice and Calculations Relating to Magnetic and Gyro Compasses

New and enlarged edition with additional material on the theory of ships' degaussing and a comprehensive wholly revised section on gyro compasses.

'It can be safely recommended to students studying for the Ministry of Transport examinations.' - *Seafarer*

'This work forms an important contribution to navigational literature, in a field rather too much neglected until now. It is written primarily for students preparing for Ministry of Transport certificates as First Mate, Master, Extra Master and compass adjuster, but it should be useful also to candidates for civil air navigators' licences, and in fact to all concerned with compasses. The reviewer has seen no book on the compass to which he was more attracted.'

- *Journal of the Institute of Navigation*

The Theory and Practice of Seamanship

G. L. DANTON

'The author has written a book which will appeal immediately not only to apprentices and cadets but also to seasoned mariners. Here is the knowledge, apart from that which is gained by years of pacing a ship's deck, which is necessary to handle a vessel at sea. Because of its scope and because it contains almost every conceivable piece of information that a seaman could want, it is cheap at the price.' - *Lloyd's List*

Ahuja, 2014-04-01 Forest trees cover 30% of the earth's land surface providing renewable fuel, wood, timber, shelter, fruits, leaves, bark, roots, and are source of medicinal products in addition to benefits such as carbon sequestration, water shed protection and habitat for 1-3 of terrestrial species. However, the genetic analysis and breeding of trees has lagged behind that of crop plants. Therefore, systematic conservation, sustainable improvement, and pragmatic utilization of trees are global priorities.
