**Paddle Steamers of the Thames** Peter Box, 2000 The popularity of Thames paddle steamers as a means of transport began in the 1820s They transported millions of holidaymakers along the river and to coastal resorts initially

transporting both cargo and passengers By the 1860s these vessels were being supplanted by more modern passenger only steamers These new vessels often appeared only in the summer hence the term butterfly boats to describe them By the time of the 1871 Bank Holidays Act steamer routes were well established The steamers offered a means of escape from the daily drudgery of work to the glamorous resorts of the Thames Estuary and later across the Channel Until the First World War they were able to compete with other forms of transport and were still popular However by the mid 1930s the very concept of a paddle steamer was being threatened by the modern vessels that had appeared In the late 1960s the last paddlers were scrapped and with those vessels died often literally a Victorian heritage A few survived in static roles and today still linger on Of all the traditional Thames paddle steamers only Medway Queen survives She has returned to the Medway and her survival is the key aim of the Medway Queen Preservation Society In Paddle Steamers of the Thames Peter Box manages to bring back the noises smells and vibrations of this particular form of transport and an old fashioned way of travelling at a slow leisurely speed
