Pain Management Chris J. Main,Michael J. L.

Sullivan,Paul J. Watson,2007-09-20 This title is directed primarily towards health care professionals outside of the United States It deals specifically with the management of potentially chronic l pain how to assess patients with pain the factors involved in the development of chronic pain and the setting up and running of a pain management programme The main

focus is on musculoskeletal and fibromyalgic type pain Cancer pain is not addressed The authors address not only what is recommended in the management of pain but also whether and why it is done thereby covering not only the content of interdisciplinary pain management but also the processes involved Provides extensive background material and covers broad issues which other books lack Focuses on not only what is done with the management of pain but whether and why it is done Includes the nuts and bolts of setting up and running a pain management programme Addresses the application of pain management programmes in a wide range of fields Has a multidisciplinary approach and therefore appeals to a multidisciplinary market Two new co authors Kay Greasley and Bengt Sjolund Major restructuring of chapters and rewriting of content with new authors for many of them Greatly increased discussion of biopsychosocial management in individual clinical practice Addresses the needs of the individual practitioners as well as those working in specialised pain management units Includes more on primary care and secondary pain prevention Expanded discussion of the clinical occupational interfaces Particular emphasis on the identification and targeting of modifiable risk factors for chronic pain and prolonged disability The following topics strengthened throughout communication the nature of groups medication and iatrogenics Potential of an evidence based biopsychosocial approach to pain management highlighted *Pain Management, An Issue of Neurosurgery Clinics of North America, E-Book* Joshua M. Rosenow, Julie Pilitsis, 2022-06-23 In this issue of Neurosurgery Clinics guest editors Drs Joshua M Rosenow and Julie G Pilitsis bring their considerable expertise to the topic of Pain Management Because pain management often benefits from a multidisciplinary approach this issue addresses how pain can be assessed and managed with and without medication e g acupuncture chiropractic medicine mindfulness meditation and procedures Contains 15 relevant practice oriented topics including the multidisciplinary team in pain management healthcare disparity in pain nonopioid postoperative pain management holistic therapy what works and what does not machine learning and pain outcomes and more Provides in depth clinical reviews on pain management offering actionable insights for clinical practice Presents the latest information on this timely focused topic under the leadership of experienced editors in the field Authors synthesize and distill the latest research and practice guidelines to create clinically significant topic based reviews

Sedation at the End-of-life: An Interdisciplinary Approach Paulina Taboada, 2014-10-21 The book's main contribution is its interdisciplinary approach to the issue of sedation at the end of life Because it occurs at the end of life palliative sedation raises a number of important ethical and legal questions including whether it is a covert form of euthanasia and for what purposes it may legally be used Many of the book chapters address the first question and almost all deal with a specific form of the second whether palliative sedation should be used for those experiencing existential suffering This raises the question of what existential suffering is a topic that is also discussed in the book The different chapters address these issues from the perspectives of the relevant disciplines Palliative Medicine Bioethics Law and Theology Hence helpful accounts of the clinical and historical background for this issue are provided and the importance of drawing accurate

ethical and legal distinctions is stressed throughout the whole book So the volume represents a valuable contribution to the emerging literature on this topic and should be helpful across a broad spectrum of readers philosophers theologians and physicians

Pain Management, An Issue of Hand Clinics Catherine Curtin, 2016-03-09 This issue will cover everything from various therapies to alleviate symptoms or help patients learn to cope to regain normal function of their hand or upper extremity and resume daily activities to mechanism anatomy and outcomes and measurement of pain

Biobehavioral Approaches to Pain Rhonda J. Moore, 2008-12-16 Pain is a common symptom yet it is frequently underevaluated and undertreated It is difficult to define describe and sometimes to prove It s pain and suspicions of exaggerations often add further insult to a patients injuries Biobehavioral Approaches to Pain translates this highly subjective experience and its physical psychological social and cultural dimensions into practical insights key to transforming the field of pain management This pathbreaking volume synthesizes a rich knowledge base from across disciplines including neurobiologic genetic biobehavioral clinical narrative substance abuse health services ethical and policy perspectives for a deeper understanding of the impact of pain on individual lives and the larger society Its international panel of contributors highlights special issues and review best practice guidelines from placebo effects to cancer Whiplash Associated Disorders to pain imaging to complementary medicine phantom limb pain to gene therapies to AIDS Among the topics covered The distinction between acute and chronic pain is it clinically useful Improving clinical assessment of patients with pain Age and sex differences in pain The what how and why of the placebo and nocebo effect Psychosocial and partner assisted biopsychosocial interventions for disease related pain Substance abuse issues in pain treatment The personal social and economic costs of chronic pain Biobehavioral Approaches to Pain offers clinical and health professionals psychologists as well as specialists in pain management or palliative care new directions in their ongoing dialogue with patients Given the prevalence of pain in the general population it should also interest researchers and students in the field of public health
