like Maciunas's Prepared Table Tennis played with paddles that have huge holes in them. In all of these examples the existence apprehending processes occur via unexpected itineraries in vacant but nevertheless enunciative codes in seemingly futile yet calibrating performances and in a temporality that is the cumulative time's other. They catapult the mind into the realm of the extra-linguistic, the para-logical and the meta-experiential or they transfigure it through a series of reticular iterations. Forty years after Varela et al.'s groundbreaking work on the embodied emotional and environmentally embedded mind that marked a definitive departure from its former strictly rational conception, there is a need to re-examine the territory that lies beyond mind for a different reason: the proliferation of algorithmic logics that rely on the idea of a rational agent, human or algorithmic, making logical self-serving decisions. This special issue explores neither rational nor irrational forms of thinking and making. It sketches a cartography of a rational processes of meaning and knowledge production that operate across numerous sites, practices and disciplines: visual and media art, literature, art history, music, dance, film, intermedia and photography. Part I, *Ahistoricity, Assemblages and Interpretative Reversals*, focuses on the legacy of the neo-avant-garde and a-modernism. Part II, *Destinerrance, Labyrinths and Folds*, investigates the ways in which the Derridian delays, detours and the Deleuzian folding function as concrete ways of embodied knowledge production. Part III, *Immanent Transcendence*, offers a glimpse into the reticular and iterative structuring of transcendence that does not pre-exist immanence but is its residue.
