**Art Without Borders** Ben-Ami Scharfstein, 2009-08-01 People all over the world make art and take pleasure in it and they have done so for millennia But acknowledging that art is a universal part of human experience leads us to some big questions Why does it exist Why do we enjoy it And how do the world's different art traditions relate to art and to each other Art Without Borders is an extraordinary exploration of those questions a profound and personal meditation on the human hunger for art and a dazzling synthesis of the whole range of inquiry into its significance Esteemed thinker Ben Ami Scharfstein's encyclopedic erudition is here brought to bear on the full breadth of the world of art He draws on neuroscience and psychology to understand the way we both perceive and conceive of art including its resistance to verbal exposition Through examples of work by Indian Chinese European African and Australian artists Art Without Borders probes the distinction between accepting a tradition and defying it through innovation which leads to a consideration of the notion of artistic genius Continuing in this comparative vein Scharfstein examines the mutual influence of European and non European artists Then through a comprehensive evaluation of the world's major art cultures he shows how all of these individual traditions are gradually but haltingly conjoining into a single current of universal art Finally he concludes by looking at the ways empathy and intuition can allow members of one culture to appreciate the art of another Lucid learned and incomparably rich in thought and detail Art Without Borders is a monumental accomplishment on par with the artistic achievements Scharfstein writes about so lovingly in its pages

The Practices of Painting in Japan, 1475-1500 Quitman E. Phillips, 2000 This book attempts to expand the grounds and methodology of studying Japanese art history by focusing on the conditions procedures events and social interplay that characterized the production of paintings in late fifteenth century Japan Though the book's ultimate concerns are art historical its analysis also draws heavily from the insights of sociology and social history At its core is a fresh examination of the major primary documents of the period in an attempt to liberate the study from assumptions long embedded in the historiography of late medieval Japanese painting history Early chapters describe documents methods basic sites and conditions of painting before turning to the main contribution of the book painting considered as a body of social practices The production of painting in the late fifteenth century was profoundly social dynamically related to the circumstances of its agents Painters advisors assistants clients and others did not exert themselves simply to bring paintings into existence They sought advantages such as wealth and prestige met obligations and satisfied the demands of custom Surviving documents from the period present rich evidence of the involvement of such persons in the imperial court the Ashikaya Gozan community the great temples of Nara and the halls of local lords The author takes into account the patterns of expectation that existed at the various sites but does not construe them as static and

mechanically determined Rather he shows that expectations evolved in response to changed conditions Although this study specifically addresses the last quarter of the fifteenth century it can aid future research in Japanese painting practice in other eras by serving as a model of how new interpretations can emerge from close documentary investigation     **An**

**Introduction to Chinese Culture through the Family** Howard Giskin,Bettye S. Walsh,2001-07-26 An Introduction to Chinese Culture through the Family covers a central element of Chinese culture the idea of family or jia Written for both beginners and specialists this book considers the role of family literally metaphorically and as an organizing principle in the creation of the Chinese worldview Individual chapters explore philosophy art language music folk literature fiction architecture film and women and gender     **The Figurative Works of Chen Hongshou (1599-1652)** TamaraHeimarck Bentley,2017-07-05 Despite the importance of Chen Hongshou 1599 1652 as an artist and scholar of the Ming period until now no full length study in English has focused on his work Author Tamara H Bentley takes a broadly interdisciplinary approach treating Chen s oeuvre in relation to literary themes and economic changes and linking these larger concerns to visual analyses Considering Chen s paintings and prints alongside Chen s romance drama commentaries and prefaces and his collected writings particularly poetry Bentley sheds new light not only on Chen but also on an important cultural moment in the first half of the seventeenth century Through analysis of Chen s figure paintings and print designs Bentley examines the artist s engagement with the values of authenticity and emotion which were part of a larger discourse stressing idiosyncrasy the individual voice and vernacular literature She contrasts these values with the commercial aspects of his production geared at an expanding art market of well to do buyers excavating the apparent contradiction inherent in the two pursuits In the end she suggests the emphasis on the authentic voice was marketed to a broad field of anonymous buyers Though her primary focus is on Chen Hongshou Bentley s investigation ultimately concerns not only this individual artist but also the effect of early modern changes on an artist s mode of working and his self image in the West as well as the East The study touches upon expanding international trade and the rise of middle class art markets including print markets not only in China but also in the Dutch Republic in circa 1630 1650 Bentley investigates the specific rhetoric of different categories of images including Chen s non literal figurative works literal commemorative portraits his printed romance drama illustrations and his printed playing cards Bentley s investigation takes in issues of studio practice including various types of image replicati

**The Figurative Works of Chen Hongshou (1599-1652)** Tamara Heimarck Bentley,Hongshou Chen,2012 Despite the importance of Chen Hongshou 1599 1652 as an artist and scholar of the late Ming period until now no full length study in English has focused on his work Author Tamara H Bentley takes a broadly interdisciplinary approach treating Chen s oeuvre in relation to literary themes and economic changes and linking these larger concerns to visual analyses In so doing Bentley sheds new light not only on Chen but also on an important cultural moment in the first half of the seventeenth century when Chinese scholar artists began to direct their work towards anonymous public markets     **Dimensions of Originality**

Katharine P Burnett,2013-03-13 This book investigates the issue of conceptual originality in art criticism of the seventeenth century a period in which China dynamically reinvented itself In art criticism the term which was called upon to indicate conceptual originality more than any other was qi literally different but secondarily odd like a number and by extension the novel and extraordinary This work finds that originality expressed through visual difference was a paradigmatic concern of both artists and critics Burnett speculates on why many have dismissed originality as a possible traditional Chinese value and the ramifications this has had on art historical understanding She further demonstrates that a study of individual key terms can reveal social and cultural values and provides a linear history of the increase in critical use of qi as originality from the fifth through the seventeenth centuries exploring what originality looks like in artworks by members of the gentry elite and commoner classes and explains how the value lost its luster at the end of the seventeenth century **A Companion to**

**Chinese Ways of Seeing and Open-Air Painting** Yi Gu, 2021-02-01 How did modern Chinese painters see landscape Did they depict nature in the same way as premodern Chinese painters What does the artistic perception of modern Chinese painters reveal about the relationship between artists and the nation state Could an understanding of modern Chinese landscape painting tell us something previously unknown about art political change and the epistemological and sensory regime of twentieth century China Yi Gu tackles these questions by focusing on the rise of open air painting in modern China Chinese artists almost never painted outdoors until the late 1910s when the New Culture Movement prompted them to embrace direct observation linear perspective and a conception of vision based on Cartesian optics The new landscape practice brought with it unprecedented emphasis on perception and redefined artistic expertise Central to the pursuit of open air painting from the late 1910s right through to the early 1960s was a reinvigorated and ever growing urgency to see suitably as a Chinese and to see the Chinese homeland correctly Examining this long overlooked ocular turn Gu not only provides an innovative perspective from which to reflect on complicated interactions of the global and local in China but also calls for rethinking the nature of visual modernity there
