Pairs Of Compact Convex Sets Fractional Arithmetic With Convex Sets:

Pairs of Compact Convex Sets Diethard Ernst Pallaschke,R. Urbanski,2013-04-17 The book is devoted to the theory of pairs of compact convex sets and in particular to the problem of finding different types of minimal representants of a pair of nonempty compact convex subsets of a locally convex vector space in the sense of the Riesz-Markov-Halmos Theory Minimal pairs of compact convex sets arise naturally in different fields of mathematics as for instance in non smooth analysis set valued analysis and in the field of combinatorial convexity In the first three chapters of the book the basic facts about convexity mixed volumes and the Riesz-Markov-Halmos lattice are presented Then a comprehensive theory on inclusion minimal representants of pairs of compact convex sets is given Special attention is given to the two dimensional case where the minimal pairs are uniquely determined up to translations This fact is not true in higher dimensional spaces and leads to a beautiful theory on the mutual interactions between minimality under constraints separation and decomposition of convex sets convexifiers and invariants of minimal pairs
