Patterns Of Racism :

Race, Racialization and Antiracism in Canada and Beyond Genevieve Fuji Johnson, Randy Enomoto, 2007-06-23 This multidisciplinary volume brings together scholars and activists to examine expressions of racism in contemporary policy areas including education labour immigration media and urban planning While anti racist struggles during the twentieth century were largely pitched against overt forms of racism e g pogroms genocide segregation apartheid and ethnic cleansing it has become increasingly apparent that there are other less visible forms of racism These subtler incarnations are of special interest to the contributors The intent of *Race Racialization and Antiracism in Canada and Beyond* is to probe systemic forms of racism as well as to suggest strategies for addressing them The collection is organized by themes pertinent to political and social expressions of racism in Canada and the wider world such as the state and its mediation of race education and the perpetuation of racist marginalization and the role of the media The contributors argue that in order to effectively combat racism various methodological approaches are required approaches that are reflective of the diversity of the world we seek to understand

"I'm Not a Racist, But..." Lawrence Blum, 2015-08-01 Not all racial incidents are racist incidents Lawrence Blum says We need a more varied and nuanced moral vocabulary for talking about the arena of race We should not be faced with a choice of racism or nothing Use of the word racism is pervasive An article about the NAACP's criticism of television networks for casting too few minority actors in lead roles asks Is television a racist institution A white girl in Virginia says it is racist for her African American teacher to wear African attire Blum argues that a growing tendency to castigate as racism everything that goes wrong in the racial domain reduces the term's power to evoke moral outrage In *I'm Not a Racist But* Blum develops a historically grounded account of racism as the deeply morally charged notion it has become He addresses the question whether people of color can be racist defines types of racism and identifies debased and inappropriate usages of the term Though racial insensitivity racial anxiety racial ignorance and racial injustice are in his view not racism they are racial ills that should elicit moral concern Blum argues that race itself even when not serving distinct racial malfeasance is a morally destructive idea implying moral distance and unequal worth History and genetic science reveal both the avoidability and the falsity of the idea of race Blum argues that we can give up the idea of race but must recognize that racial groups historical and social experience has been shaped by having been treated as if they were races

Embedded Racism Debito Arudou,2021-11-26 Despite domestic constitutional provisions and international treaty promises Japan has no law against racial discrimination Consequently businesses around Japan display Japanese Only signs denying entry to all foreigners on sight Employers and landlords routinely refuse jobs and apartments to foreign applicants Japanese police racially profile foreign looking bystanders for invasive questioning on the street Legislators administrators and pundits portray foreigners as a national security threat and call for their segregation and expulsion Nevertheless Japan s government and media claim there is no discrimination by race in Japan therefore no

laws are necessary How does Japan resolve the cognitive dissonance of racial discrimination being unconstitutional yet not illegal Embedded Racism untangles Japan's complex narrative on race Starting with case studies of hundreds of Japanese Only exclusionary businesses it carefully analyzes the social construction of Japanese identity through laws public policy jurisprudence and media messages It reveals how the concept of a Japanese has been racialized to the point where one must look Japanese to have equal civil and human rights in Japan Completely revised and updated for this Second Edition including landmark events like the 2020 Tokyo Olympics the Covid Pandemic and the Carlos Ghosn Case Embedded Racism is the product of three decades of research and fieldwork by a scholar living in Japan as a naturalized Japanese citizen It offers a perspective into how Japan's entrenched misunderstood and deliberately overlooked racial discrimination not only undermines Japan's economic future but also emboldens white supremacists worldwide who see Japan as their template ethnostate

Ethnicity in College Anna M. Ortiz, Silvia J. Santos, 2023-07-03 This book explores the importance and construction of ethnic identity among college students and how ethnicity interfaces with students' interactions on campus and the communities in which they live Based on qualitative interviews with White Latina o African American and Asian students it captures both the college context and the individual experiences students have with their ethnicity through the immediacy of the students' own voices The authors observe how students negotiate their ethnic identity within the process of becoming adults They identify the influences of family the importance of socio-historical forces that surround students' educational experiences and the critical role of peers in students' ethnic identity development While research has begun to document the positive outcomes associated with diverse learning environments this study emphasizes and more closely delineates just how these outcomes come to be In addition the study reveals how the freedom to express and develop ethnic identity which multicultural environments ideally support promotes student confidence and achievement in ways which students themselves can articulate This work is distinctive in eschewing an ethnic minority perspective through which Whites are the primary reference group and the standard from which all ethnic and racial identity processes evolve as well as in considering the influences that growing up in a multi-ethnic context may have on ethnic identity processes particularly where the other is not White This perspective is particularly important at a time when students entering universities are more likely to come from highly segregated high school environments and will confront ethnic and social differences for the first time in college This book is intended as a resource for researchers and practitioners in psychology and higher education It offers insights for student affairs and higher education administrators and leaders about the ways in which their campus policies and practices can positively influence the development of more supportive campus climates that draw on the strengths of each ethnic group to create an overarching pluralistic culture It can also serve as a cultural diversity text for upper division or graduate courses on pluralism Moreover understanding students' ethnic identity their personal growth and adjustment to college it is central to preparing individuals for life in a pluralistic society

Stewart, 2016-11-17 The concept of a postracial America the dream of a nation beyond race has attracted much attention over the course of the presidency of Barack Obama suggesting that this idea is peculiar to the contemporary moment alone Postracial America An Interdisciplinary Study attempts to broaden the application of this idea by situating it in contexts that demonstrate how the idea of the postracial has been with America since its founding and will continue to be long after the Obama administration's term ends The chapters in this volume explore the idea of the postracial in the United States through a variety of critical lenses including film studies literature aesthetics and conceptual thinking politics media representations race in relation to gender identity and sexuality and personal experiences Through this diverse interdisciplinary exploration this collection skeptically weighs the implications of holding up a postracial culture as an admirable goal for the United States

Essays on Secularism and Multiculturalism Tariq Modood, 2019-04-25 Whether the recently settled religious minorities Muslims in particular can be accommodated as religious groups in European countries has become a central political question and threatens to create long term fault lines In this collection of essays Tariq Modood argues that to grasp the nature of the problem we have to see how Muslims have become a target of a cultural racism Islamophobia Yet the problem is not just one of anti racism but of an understanding of multicultural citizenship of how minority identities including those formed by race ethnicity and religion can be incorporated into national identities so all can have a sense of belonging together This means that the tendency amongst some to exclude religious identities from public institutions and the re making of national identities has to be challenged Modood suggests that this can be done in a principled yet pragmatic way by drawing on Western Europe's moderate political secularism and eschewing forms of secularism that offer religious groups a second class citizenship
