

Strategy 3: Common Argument Patterns

- This is the most important strategy if you want to go from *recognizing* an argument to *analyzing/paraphrasing* it.
- General idea:
 - There are five very common, deductively valid argument patterns.
 - If a passage fits one of these patterns, then you know/recognize that the passage contains an argument.

Patterns Of Argument:

Patterns of Argument Bilsky,1988-01-01 *Patterns of Argument* Manuel Bilsky,1966 **The Literature Review** Lawrence A. Machi,Brenda T. McEvoy,2009 A six step model offers invaluable assistance for selecting a topic searching the literature developing arguments surveying the literature critiquing the literature and writing the literature review **Every Thing Must Go** James Ladyman,Don Ross,David Spurrett,John Collier,2007-07-05 Every Thing Must Go argues that the only kind of metaphysics that can contribute to objective knowledge is one based specifically on contemporary science as it really is and not on philosophers a priori intuitions common sense or simplifications of science In addition to showing how recent metaphysics has drifted away from connection with all other serious scholarly inquiry as a result of not heeding this restriction they demonstrate how to build a metaphysics compatible with current fundamental physics ontic structural realism which when combined with their metaphysics of the special sciences rainforest realism can be used to unify physics with the other sciences without reducing these sciences to physics itself Taking science metaphysically seriously Ladyman and Ross argue means that metaphysicians must abandon the picture of the world as composed of self subsistent individual objects and the paradigm of causation as the collision of such objects Every Thing Must Go also assesses the role of information theory and complex systems theory in attempts to explain the relationship between the special sciences and physics treading a middle road between the grand synthesis of thermodynamics and information and eliminativism about information The consequences of the author s metaphysical theory for central issues in the philosophy of science are explored including the implications for the realism vs empiricism debate the role of causation in scientific explanations the nature of causation and laws the status of abstract and virtual objects and the objective reality of natural kinds

Prototypical Argumentative Patterns Frans H. van Eemeren,2017-08-14 Prototypical Argumentative Patterns reports about a research project started at the University of Amsterdam in 2012 In this project distinctive argumentative patterns have been identified in argumentative discourse in the political the legal and the medical domain These patterns consist of constellations of argumentative moves in which in order to deal with a particular kind of difference of opinion in defence of a particular type of standpoint a particular argument scheme or combination of argument schemes is used in a particular kind of argumentation structure The composition of these prototypical argumentative patterns can be explained by referring to the institutional characteristics of the communicative activity types in which they occur By exploring the relationship between argumentative discourse and the institutional context Frans van Eemeren Bart Garssen Corina Andone Eveline Feteris and Francisca Snoeck Henkemans have provided a new and illuminating perspective on the context dependency of argumentative discourse **A Grammar of Lezgian** Martin Haspelmath,2011-09-27 The series builds an extensive collection of high quality descriptions of languages around the world Each volume offers a comprehensive grammatical description of a single language together with fully analyzed sample texts and if appropriate a word list and other relevant

information which is available on the language in question There are no restrictions as to language family or area and although special attention is paid to hitherto undescribed languages new and valuable treatments of better known languages are also included No theoretical model is imposed on the authors the only criterion is a high standard of scientific quality

Sentence Patterns in English and Hebrew Ron Kuzar, 2012-10-30 Sentence Patterns in English and Hebrew offers an innovative perspective on sentential syntax in which sentence patterns are introduced as constructions within the general framework of Construction Grammar Drawing on naturally occurring data collected from the Internet the study challenges the prevailing view of predication as the sole mechanism of sentence formation and introduces the idea of patterning as a complementary sometimes even alternative mechanism Major sentence patterns of English and Hebrew are systematically presented targeting both their form and their function A contrastive analysis of the sentence patterns in these two languages results in postulating a typological group in which cognitive motivations are shown to account for both similarities and differences within the typology Sentence Patterns in English and Hebrew will appeal to scholars of constructional approaches cognitive linguistics typology syntax as well as anyone interested in English and Hebrew Proceedings of the 1997 ACM SIGPLAN International Conference on Functional Programming (ICFP '97), Amsterdam, The Netherlands, June 9-11, 1997, 1997 **Systematic Approaches to Argument by Analogy** Henrique Jales Ribeiro, 2014-07-09 The present volume assembles a relevant set of studies of argument by analogy which address this topic in a systematic fashion either from an essentially theoretical perspective or from the perspective of it being applied to different fields like politics linguistics literature law medicine science in general and philosophy All result from original research conducted by their authors for this publication Thus broadly speaking this is an exception which we find worthy of occupying a special place in the sphere of the bibliography on the argument by analogy In effect most of the contexts of the publications on this topic focus on specific areas for example everyday discourse science or law theory while underestimating or sometimes even ignoring other interdisciplinary scopes as is the case of literature medicine or philosophy The idiosyncrasy of this volume is that the reader and the researcher may follow the development of different theoretical outlooks on argument by analogy while measuring the scope of its greater or lesser application to the aforementioned areas as a whole **Fundamentals of Legal**

Argumentation Eveline T. Feteris, 2017-07-10 This book is an updated and revised edition of Fundamentals of Legal Argumentation published in 1999 It discusses new developments that have taken place in the past 15 years in research of legal argumentation legal justification and legal interpretation as well as the implications of these new developments for the theory of legal argumentation Almost every chapter has been revised and updated and the chapters include discussions of recent studies major additions on topical issues new perspectives and new developments in several theoretical areas Examples of these additions are discussions of recent developments in such areas as Habermas theory MacCormick's theory Alexy's theory Artificial Intelligence and law and the pragma dialectical theory of legal argumentation Furthermore it

provides an extensive and systematic overview of approaches and studies of legal argumentation in the context of legal justification in various legal systems and countries that have been important for the development of research of legal argumentation. The book contains a discussion of influential theories that conceive the law and legal justification as argumentative activity. From different disciplinary and theoretical angles it addresses such topics as the institutional characteristics of the law and the relation between general standards for moral discussions and legal standards such as the Rule of Law. It discusses patterns of legal justification in the context of different types of problems in the application of the law and it describes rules for rational legal discussions. The combination of the sound basis of the first edition and the discussions of new developments make this new edition an up to date and comprehensive survey of the various theoretical influences which have informed the study of legal argumentation. It discusses salient backgrounds to this field as well as major approaches and trends in the contemporary research. It surveys the relevant theoretical factors both from various continental law traditions and common law countries.
