Patterns of Bias in Hollywood Movies John W. Cones,2012 It s pretty broadly recognized that Hollywood movies contain patterns of bias but it s not just people of color or women who are hurt by this Many groups within America s multicultural society have complained over the years about negative and stereotypical portrayals of their own group members in motion pictures produced or released through the Hollywood based studios Yet as an expert on the U S film industry points out such complaints have had little impact on consistent patterns of bias in movies This book takes a broader look at the nature of negative and stereotypical movie portrayals and tracks patterns of such one sided depictions over a longer period time As a result the patterns of bias and the source the problem become more clear The problem appears be that most of the people who have green light authority in the U S film industry for either the production and or distribution of a motion picture share a common ethnic religious cultural background Thus the stories of their cohort and those of all other ethnic religious and or cultural groups whose members seldom achieve positions of power Hollywood are being filtered through the cultural sensibilities of a single group John Cones suggests that the solution could lie in increasing diversity at the highest levels in the U S film industry This work grew out of the observed frustration of film industry critics who have pointed out examples of bias and stereotyping in specific movies over the years only to be rebuffed by the simplistic studio arguments that such films reflect the real world and that moviegoers vote with their pocket books It can be shown that there is a consistent pattern to the choices Hollywood studio executives make with respect to the movies produced and released and the specific content of those movies and it becomes obvious that Hollywood is selectively portraying reality Movie goers only have limited options among all of the possibilities that could be portrayed on the silver screen This book differs from other studies touching on bias in motion pictures Most such books focus on the treatment of a single ethnic religious cultural racial or other readily identifiable interest group but this study attempts to provide an overview and to identify patterns over time When the patterns of bias in motion picture content are sufficiently demonstrated and documented it becomes easier to identify the source of the bias and to explain why such bias exists

Racism Debito Arudou, 2021-11-26 Despite domestic constitutional provisions and international treaty promises Japan has no law against racial discrimination Consequently businesses around Japan display Japanese Only signs denying entry to all foreigners on sight Employers and landlords routinely refuse jobs and apartments to foreign applicants Japanese police racially profile foreign looking bystanders for invasive questioning on the street Legislators administrators and pundits portray foreigners as a national security threat and call for their segregation and expulsion Nevertheless Japan's government and media claim there is no discrimination by race in Japan therefore no laws are necessary How does Japan resolve the cognitive dissonance of racial discrimination being unconstitutional yet not illegal Embedded Racism untangles Japan's complex narrative on race Starting with case studies of hundreds of Japanese Only exclusionary businesses it carefully analyzes the social construction of Japanese identity through laws public policy jurisprudence and media messages It reveals how the concept of a Japanese has been racialized to the point where one must look Japanese to have equal civil and human rights in Japan Completely revised and updated for this Second Edition including landmark events like the 2020 Tokyo Olympics the Covid Pandemic and the Carlos Ghosn Case Embedded Racism is the product of three decades of research and fieldwork by a scholar living in Japan as a naturalized Japanese citizen It offers a perspective into how Japan's entrenched misunderstood and deliberately overlooked racial discrimination not only undermines Japan's economic future but also emboldens white supremacists worldwide who see Japan as their template ethnostate Social Psychology Kopano Ratele, Norman Duncan, 2003 Using current socio political thought and research this book examines topics such as violence social and political transition race and racism and sexualities Theoretical and empirical research are related to topical problems highlighting the complex relations of individuals to their societies and to one another The histories and complexities of problems and their interconnectedness are examined and possible solutions are suggested Special attention is paid to class sexuality gender and race making psychology in general and social psychology in particular relevant and exciting *Encyclopedia of Race, Ethnicity, and Society* Richard T. Schaefer, 2008-03-20 This encyclopedia offers a comprehensive look at the roles race and ethnicity play in society and in our daily lives Over 100 racial and ethnic groups are described with additional thematic essays offering insight into broad topics that cut across group boundaries and which impact on society **Patterns of Racial Discrimination** Ann R. Horowitz, George M. Von Furstenberg, 1974 Resources in Women's Educational Equity: Special Issue, 1979 **After Brown** Charles T. Clotfelter, 2011-10-16 The United States Supreme Court's 1954 landmark decision Brown v Board of Education set into motion a process of desegregation that would eventually transform American public schools This book provides a comprehensive and up to date assessment of how Brown's most visible effect contact between students of different racial groups has changed over the fifty years since the decision Using both published and unpublished data on school enrollments from across the country Charles Clotfelter uses measures of interracial contact racial isolation and segregation to chronicle the changes He goes beyond previous studies by drawing

on heretofore unanalyzed enrollment data covering the first decade after Brown calculating segregation for metropolitan areas rather than just school districts accounting for private schools presenting recent information on segregation within schools and measuring segregation in college enrollment Two main conclusions emerge First interracial contact in American schools and colleges increased markedly over the period with the most dramatic changes occurring in the previously segregated South Second despite this change four main factors prevented even larger increases white reluctance to accept racially mixed schools the multiplicity of options for avoiding such schools the willingness of local officials to accommodate the wishes of reluctant whites and the eventual loss of will on the part of those who had been the strongest protagonists in the push for desegregation Thus decreases in segregation within districts were partially offset by growing disparities between districts and by selected increases in private school enrollment
