Freedom to Learn Art Willans,Cari Williams,2018-05-15 Ditch the behavioral charts and start teaching for universal success Disinterested students and behavioral problems are all too common in schools Yet results show that behavior charts and other reward and punishment systems simply don t work Teachers are burning out and students are failing But what can be done The secret lies in a unique combination of behavioral science neuropsychology and group dynamics When teachers get the classroom experience right students want to succeed and achieve to their potential while behavioral problems largely vanish For decades it has been widely accepted that children have motivating needs including the need to avoid pain a need for autonomy and the need to belong The authors harness these motivations into a method of interactions that increases cooperation and in which children want to succeed and help others to thrive Packed with real classroom examples and practical guidance for using the methods this guide gives teachers the tools to transform even difficult classrooms Start
