The Educated Imagination and Other Writings on Critical Theory 1933-1963 Northrop Frye, 2006-12-15

In 1933 Northrop Frye was a recent university graduate beginning to learn his craft as a literary essayist. By 1963 with the publication of *The Educated Imagination* he had become an international academic celebrity. In the intervening three decades Frye wrote widely and prodigiously but it is in the papers and lectures collected in this installment of the *Collected Works of Northrop Frye* that the genesis of a distinguished literary critic can be seen. Here is Frye tracing the first outlines of a literary cosmology that would culminate in *The Anatomy of Criticism* 1958 and shape *The Great Code* 1982 and *Words with Power* 1990. At the same time that Frye garnered such international acclaim he was also a working university teacher lecturing in the University of Toronto's English Language and Literature program. In her lively introduction Germaine Warkentin links Frye's evolution as a critic with his love of music, his passionate concern for his students and his growing professional ambition. The writings included in this volume show how Frye integrated ideas into the work that would consolidate the fame that *Fearful Symmetry* 1947 had first established.
