**How to Be, and Remain, a Compassionate Educator** Anne Emerson, 2025-04-17 As educators the attitude with which we approach our work has considerable impact on the outcome for students Our assumptions and expectations influence learning both positively and negatively This book adopts a compassionate acceptance that all children no matter what they say don't say or do are doing the best they can in that moment It is in the adults power and their responsibility to understand children and barriers they experience in their learning By exploring neuroscience psychology and learning theory we can increase our awareness of brain organisation and function to help us understand why a child isn't doing what we have asked With understanding comes both our compassion and ability to support The case studies and examples from the author's practice illustrate how we can learn from effective strategies for neurodivergent children to build insight into all pupils When we adopt a non-judgemental and encouraging approach we form positive collaborative relationships with children and their families that increase engagement with and enjoyment of learning and reduces our own frustration and stress This book is valuable reading for all educators equipping them with an understanding that allows them to work flexibly and creatively to meet the learning and emotional needs of all pupils

**Learning Beyond the Classroom** Tom Bentley, 2012-12-06 Education has become one of our major concerns at the heart of any strategy for

prosperity and social cohesion But young people are having more difficulty than ever before in adapting to the world they will enter as adults Tom Bentley argues that if education is to meet the emerging challenges of the twenty first century we must recognise that learning takes place far beyond the formal education sector We cannot rely solely on dedicated teachers to deliver the understanding and personal qualities young people will need Instead we must connect what happens in schools to wider opportunities for learning Drawing on a wide ranging review of educational innovation and on contemporary analysis of economic social and technological change this book shows that creating an education revolution requires us to think far more radically about young people and the options for reform and outlines a vision of education fit for the twenty first century Tom Bentley is a senior researcher at Demos the independent think tank He was born and educated in East London and at Oxford University His research areas include young people education the future of work and combating of social exclusion
