Varieties of Scientific Experience Lewis S. Feuer, Lewis S. Feuer shows that the gestation of the hypotheses of original-minded scientists such as Darwin, Einstein, or Bohr is in large part a subconscious process. Scientists try to project upon the world structural laws that, beside fitting the given physical realities, will also realize their own emotional longings among alternative worldviews. Repeatedly, too, in examining the standpoints of philosophical figures ranging from Spinoza, Descartes, Kant, and Mill to contemporary figures such as Einstein, Lovejoy, and Hooker, Feuer illumines how sociological antipathies project themselves into scientific divergences. Feuer delves into the bearing of emotive beliefs such as pacifism, socialism, anti-Semitism upon the formation of concurrent worldviews, often fixations of scientific belief held with the same passion in science as in religion.
