Wadehra,1986-04-01 This workshop discusses the current state and future directions of research in positron gas scattering particularly in the relationship between positron and electron scattering by the same atoms and molecules The possible applications of positron gas scattering to astrophysical phenomena have also been discussed Physics with Many Positrons Alfredo Dupasquier,Allen P. Mills,Roberto S. Brusa,2010 With the exception of positron emission tomography PET the field of low energy positron science produces relatively few academic articles each year compared to more accessible fields Though much has been achieved since the publication of two related volumes earlier in this series Positron Solid State Physics 1981 and Positron Spectroscopy of Solids 1993 only the first steps have been made towards physics with many positrons physical situations where the interactions of positrons with positrons can be observed This 2009 Enrico Fermi School aims to stimulate the field o **Solid State** ,1983-12-01 Solid State New Directions in Antimatter Chemistry and Physics Clifford M. Electron-positron Plasmas Steven Jay Gilbert,2000 *Atomic Physics with Positrons* J.W. Humberston,E.A.G.

Armour,2012-12-06 The NATO Advanced Research Workshop on Atomic Physics with Positrons which was held at University College London during 15-18 July 1987 was the fourth meeting in a series devoted to the general theme of positron collisions in gases. Previous meetings have been held at York University Toronto 1981, Royal Holloway College Egham 1983 and Wayne State University Detroit 1985. Recent very significant improvements in positron beam currents due to the development of more efficient moderators and the use of more intense positron sources are making possible an increasingly sophisticated range of experiments in atomic collision physics. Whereas a few years ago only total scattering cross sections could be determined, measurements can now be made of various partial and differential cross sections. Intense positron beams are also being used to produce positronium beams and already as reported here preliminary investigations have been made of collisions of positronium with several target systems. These experimental developments have stimulated and been stimulated by steady if somewhat less spectacular progress in associated theoretical studies. Both aspects of the field are well represented in these Proceedings.

Response of the High Granularity Calorimeter HGCal and Characterisation of the Higgs Boson Matteo Bonanomi,2023-04-21 This book highlights the most complete characterization of the Higgs boson properties performed to date in the golden channel, i.e. decay into a pair of Z bosons which subsequently decay into four leptons. The data collected by the CMS experiment in the so-called Run II data taking period of the LHC are used to produce an extensive set of results that test in detail the predictions of the Standard Model. Given the remarkable predictive power of the SM when including the Higgs boson, possible new physics will require even more extensive studies at higher statistics. A massive upgrade of the detectors is necessary to maintain the current physics performance in the harsh environment of the High Luminosity LHC. The HL-LHC project is expected to start by the end of 2027. The CMS Collaboration will replace the current endcap calorimeters with a High Granularity Calorimeter HGCal. The HGCal will be the very first large-scale silicon-based imaging calorimeter ever employed in a high-energy physics experiment. This book presents the results of the analysis of the test beam data collected with the first large-scale prototype of the HGCal. The results of this analysis are used to corroborate the final design of the HGCal and its nominal physics performance expected for the HL-LHC operations.

Positron Scattering in Gases John W. Humberston,M.R.C. McDowell,2012-12-06 The first conference in this series devoted principally to the interaction of positrons in gases was held at York University Toronto in July 1981, immediately preceding the XII ICPEAC in Gatlinburg and the proceedings were published in the Canadian Journal of Physics volume 60 1982. So successful was this meeting that the decision was taken to hold a second one around the time of XIII ICPEAC in Berlin in 1983. London was clearly a convenient location but rather than the obvious choice of University College London in central London the Organising Committee decided that the beautiful and peaceful surroundings of Royal Holloway College would provide a more pleasant and intimate atmosphere for a small meeting. Even a small conference requires substantial sums of money to pay the

expenses of invited speakers and when considering possible sources of funds the Organising Committee recognised that the intended format of the meeting and the international composition of the participants made it appropriate to apply to the NATO Science Committee for support under the Advanced Research Workshop Programme This was one of the few successful applications made this year and so it was that the conference became the NATO Advanced Research Workshop on Positron Scattering in Gases The Workshop with approximately sixty participants started after lunch on 19 July 1983 and finished at mid day on 23 July *Energy Research Abstracts*, 1993 The Physics and Technology of Amorphous SiO₂ Roderick A.B. Devine, 2012-12-06 The contents of this volume represent most of the papers presented either orally or as posters at the international conference held in Les rd th Arcs Savoie from June 29 to July 3 1987 The declared objective of the conference was to bring together specialists working in various fields both academic and applied to examine the state of our understanding of the physics of amorphous sioz from the point of view of its structure defects both intrinsic and extrinsic its ability to trans port current and to trap charges its sensitivity to irradiation etc For this reason the proceedings is divided as was the conference schedule into a number of sections starting from a rather academic viewpoint of the internal structure of idealized SiO and progressing 2 towards subjects of increasing technological importance such as charge transport and trapping and breakdown in thin films The proceedings terminates with a section on novel applications of amorphous SiOz and in particular buried oxide layers formed by ion implantation Although every effort was made at the conference to ensure that each presentation occurred in its most obvious session in editing the proceedings we have taken the liberty of changing the order where it seems that a paper was in fact more appropriate to an alternative section In any event because of the natural overlap of subjects many papers could have been suitably placed in several different sections *Slow Positron Beam Techniques for Solids and Surfaces* Eric Ottewitte, Alex Weiss, 1994 This text examines the application of positron beams to studies of solids and surfaces with profiles for an increasing array of materials It presents the progress made in areas of defect profiling including improvements in theoretical modelling Physics And Applications Of High Brightness Electron Beams, The - Proceedings Of The Icfa Workshop James B Rosenzweig, Luca Serafini, Gil Travish, 2003-12-18 This book contains the contributions to the Workshop on the Physics and Applications of High Brightness Electron Beams held in July 2002 in Sardinia Italy This workshop had a broad international representation from the fields of intense electron sources free electron lasers advanced accelerators and ultra fast laser plasma beam plasma and laser beam physics The interdisciplinary participants were brought together to discuss advances in the creation and understanding of ultra fast ultra high brightness electron beams and the unique experimental opportunities in frontier high energy density and radiation source physics which are offered by these scientific tools The proceedings have been selected for coverage in Index to Scientific Technical Proceedings ISTP ISI Proceedings Index to Scientific Technical Proceedings ISTP CDROM version ISI Proceedings
