Possessing Nature Museums Collecting And Scientific Culture In Earl:

Nature and culture Samuel J. M. M. Alberti, 2017-10-03 This is a vital new work the first to take the University of Manchester's Museum as its subject By setting the museum in its cultural and intellectual contexts *Nature and culture* explores twentieth century collecting and display and the status of the object in the modern world Beginning with the origins of the Manchester Museum accounting for its development as an internationally renowned university museum and concluding at its major expansion at the turn of the millennium this book casts new light on the history of museums How did objects become knowledge Who encountered museum objects on their way to museums What happened to collections within the museum How did visitors use and respond to objects In answering these questions *Nature and culture* illuminates not only the history of one institution but also contributes to wider discussions in the history of science cultural history and museology

Italian Merchants in the Early-Modern Spanish Monarchy Catia Brilli, Manuel Herrero Sánchez, 2019-05-16 Italian businessmen played a key role in both international trade and finance from the Middle Ages until the first decades of the seventeenth century While the peak of their influence within and beyond Europe has been thoroughly examined by historians the way in which merchants from the Italian peninsula reacted and adapted themselves to the emergence of greater commercial and financial powers is mostly overlooked This collection based on a vast variety of primary sources seeks to explore the persisting presence of Florentine Genoese and Milanese intermediaries in some key hubs of the Spanish monarchy such as Seville Cadiz Madrid and Naples as well as in eighteenth century Lisbon The resilience of powerless merchant nations from the Italian Peninsula in the face of increasing competition in long distance trade is deconstructed by analyzing the merchants relational dimension and the formal institutional resources they found in the host societies By offering new insights into the mechanisms of circulation of men goods and capital throughout the Iberian world this book will contribute to better assess the polycentric nature of the Spanish monarchy and more in general the complex system of commercial exchanges in the age of the first globalization This book was originally published as a special issue of the *European Review of History Revue européenne d'histoire*

The Doctor's Garden Clare Hickman, 2021-01-01 A richly illustrated exploration of how late Georgian gardens associated with medical practitioners advanced science education and agricultural experimentation As Britain grew into an ever expanding empire during the late eighteenth and early nineteenth centuries new and exotic botanical specimens began to arrive within the nation's public and private spaces Gardens became sites not just of leisure sport and aesthetic enjoyment but also of scientific inquiry and knowledge dissemination Medical practitioners used their botanical training to capitalize on the growing fashion for botanical collecting and agricultural experimentation in institutional semipublic and private gardens across Britain This book highlights the role of these medical practitioners in the changing use of gardens in the late Georgian period marked by a fluidity among the ideas of farm laboratory museum and garden Placing these activities within a wider framework of fashionable scientific and economic

interests of the time historian Clare Hickman argues that gardens shifted from predominately static places of enjoyment to key gathering places for improvement knowledge sharing and scientific exploration **The Making of the English**

Gardener Margaret Willes, 2011-08-30 The people and publications at the root of a national obsession *A Traffic of Dead Bodies* Michael Sappol, 2018-06-05 A Traffic of Dead Bodies enters the sphere of bodysnatching medical students dissection room pranks and anatomical fantasy It shows how nineteenth century American physicians used anatomy to develop a vital professional identity while claiming authority over the living and the dead It also introduces the middle class women and men working people unorthodox healers cultural radicals entrepreneurs and health reformers who resisted and exploited anatomy to articulate their own social identities and visions The nineteenth century saw the rise of the American medical profession a proliferation of practitioners journals organizations sects and schools Anatomy lay at the heart of the medical curriculum allowing American medicine to invest itself with the authority of European science Anatomists crossed the boundary between life and death cut into the body reduced it to its parts framed it with moral commentary and represented it theatrically visually and textually Only initiates of the dissecting room could claim the privileged healing status that came with direct knowledge of the body But anatomy depended on confiscation of the dead mainly the plundered bodies of African Americans immigrants Native Americans and the poor As black markets in cadavers flourished so did a cultural obsession with anatomy an obsession that gave rise to clashes over the legal social and moral status of the dead Ministers praised or denounced anatomy from the pulpit rioters sacked medical schools and legislatures passed or repealed laws permitting medical schools to take the bodies of the destitute Dissection narratives and representations of the anatomical body circulated in new places schools dime museums popular lectures minstrel shows and sensationalist novels Michael Sappol resurrects this world of graverobbers and anatomical healers discerning new ligatures among race and gender relations funerary practices the formation of the middle class and medical professionalization In the process he offers an engrossing and surprisingly rich cultural history of nineteenth century America **A Man of Misconceptions** John Glassie, 2012-11-08 A Scientific American Best Science Book of 2012 An Atlantic Wire Best Book of 2012 A New York Times Book Review Editor's Choice The fascinating The New Yorker story of Athanasius Kircher the eccentric scholar inventor who was either a great genius or a crackpot or a bit of both The interests of Athanasius Kircher the legendary seventeenth century priest scientist knew no bounds From optics to music to magnetism to medicine he offered up inventions and theories for everything and they made him famous across Europe His celebrated museum in Rome featured magic lanterns speaking statues the tail of a mermaid and a brick from the Tower of Babel Holy Roman Emperors were his patrons popes were his friends and in his spare time he collaborated with the Baroque master Bernini But Kircher lived during an era of radical transformation in which the old approach to knowledge what he called the art of knowing was giving way to the scientific method and modern thought A Man of Misconceptions traces the rise success and eventual fall of this fascinating character as he attempted to come to terms

with a changing world With humor and insight John Glassie returns Kircher to his rightful place as one of history's most unforgettable figures

The Language of Mineralogy Matthew D. Eddy, 2016-12-05 Classification is an important part of science yet the specific methods used to construct Enlightenment systems of natural history have proven to be the bête noir of studies of eighteenth century culture One reason that systematic classification has received so little attention is that natural history was an extremely diverse subject which appealed to a wide range of practitioners including wealthy patrons professionals and educators In order to show how the classification practices of a defined institutional setting enabled naturalists to create systems of natural history this book focuses on developments at Edinburgh's medical school one of Europe's leading medical programs In particular it concentrates on one of Scotland's most influential Enlightenment naturalists Rev Dr John Walker the professor of natural history at the school from 1779 to 1803 Walker was a traveller cleric author and advisor to extremely powerful aristocratic and government patrons as well as teacher to hundreds of students some of whom would go on to become influential industrialists scientists physicians and politicians This book explains how Walker used his networks of patrons and early training in chemistry to become an eighteenth century naturalist Walker's mineralogy was based firmly in chemistry an approach common in Edinburgh's medical school but a connection that has been generally overlooked in the history of British geology By explicitly connecting eighteenth century geology to the chemistry being taught in medical settings this book offers a dynamic new interpretation of the nascent earth sciences as they were practiced in Enlightenment Britain Because of Walker's influence on his many students the book also provides a unique insight into how many of Britain's leading Regency and Victorian intellectuals were taught to think about the composition and structure of the material world

[A History of Global Consumption](#) Ina Baghdiantz McCabe, 2014-08-27 In *A History of Global Consumption 1500-1800* Ina Baghdiantz McCabe examines the history of consumption throughout the early modern period using a combination of chronological and thematic discussion taking a comprehensive and wide reaching view of a subject that has long been on the historical agenda The title explores the topic from the rise of the collector in Renaissance Europe to the birth of consumption as a political tool in the eighteenth century Beginning with an overview of the history of consumption and the major theorists such as Bourdieu Elias and Barthes who have shaped its development as a field Baghdiantz McCabe approaches the subject through a clear chronological framework Supplemented by illustrations in every chapter and ranging in scope from an analysis of the success of American commodities such as tobacco sugar and chocolate in Europe and Asia to a discussion of the Dutch tulip mania *A History of Global Consumption 1500-1800* is the perfect guide for all students interested in the social cultural and economic history of the early modern period

Web of Nature Anna Marie Roos, 2011-07-12 This first full length biography of Dr Martin Lister 1639-1712 vice president of the Royal Society Royal Physician and the first arachnologist and conchologist provides an unprecedented picture of a seventeenth century virtuoso Lister is recognized for his discovery of ballooning spiders and as the father of

conchology but it is less well known that he invented the histogram provided Newton with alloys and donated the first significant natural history collections to the Ashmolean Museum Just as Lister was the first to make a systematic study of spiders and their webs this biography is the first to analyze the significant webs of knowledge patronage and familial and gender relationships that governed his life as a scientist and physician The Specter of the Archive Nicholas Popper,2024-01-04 An exploration of the proliferation of paper in early modern Britain and its far reaching effects on politics and society We are used to thinking of ourselves as living in a time when more information is more available than ever before In The Specter of the Archive Nicholas Popper shows that earlier eras had to grapple with the same problem how to deal with too much information at their fingertips He reveals that early modern Britain was a society newly drowning in paper a light and durable technology whose spread allowed statesmen to record drafts memoranda and other ephemera that might otherwise have been lost and also made it possible for ordinary people to collect political texts As original paperwork and copies alike flooded the government information management became the core of politics Focusing on two of the primary political archives of early modern England the Tower of London Record Office and the State Paper Office Popper traces the circulation of their materials through the government and the broader public sphere In this early media saturated society we find the origins of many issues we face today Who shapes the archive Can we trust the pictures of the past and the present that it shows us And in a more politically urgent vein Does a huge volume of widely available information not all of it accurate risk contributing to polarization and extremism **America's Curious Botanist** Nancy Everill Hoffmann,John C. Van Horne,2004 The Academy of Natural Sciences the American Philosophical Society the John Bartram Association the Library Company of Philadelphia the Pennsylvania Horticultural Society the Philadelphia Botanical Club sponsored a three day symposium in May 1999 to commemorate the 300th anniversary of John Bartram s birth This collection of essays arises from that symposium All of the essays contribute to the telling of the story of the multifaceted John Bartram whose life spanned most of the 18th century and who was called the greatest natural botanist in the world The work is published in cooperation with the Library Company of Philadelphia John Bartram Association Color black white illustrations Wonder in Shakespeare A. Cohen,2012-01-30 In the first part of this book Adam Max Cohen embraces the many meanings of wonder in order to challenge the generic divides between comedy tragedy history and romance and suggests that Shakespeare s primary goal in crafting each of his playworlds was the evocation of one or more varieties of wonder **Reading the World** Edwin D. Rose,2025-03-18 In the eighteenth and nineteenth centuries a period that marked the emergence of a global modernity educated landowners or gentlemen dominated the development of British natural history utilizing networks of trade and empire to inventory nature and understand events across the world Specimens ranging from a Welsh bittern to the plants of Botany Bay were collected recorded and classified while books were produced in London and copies distributed and used across Britain Continental Europe the Pacific Asia and the Americas Natural history connected a diverse range of

individuals from European landowners to Polynesian priests incorporating distributing synthesizing and appropriating information collected on a global scale In *Reading the World* Edwin D Rose positions books natural history specimens and people in a close cycle of literary production and consumption His book reveals new aspects of scientific practice and the specific roles of individuals employed to collect synthesize and distribute knowledge reevaluating Joseph Banks's and Daniel Solander's investigations during James Cook's Endeavour voyage to the Pacific Uncovering the range of skills involved in knowledge production Rose expands our understanding of natural history as a cyclical process from the initial collection and identification of specimens to the formal publication of descriptions to the eventual printing of sources Curiosity Barbara M. Benedict, 2001 Finely illustrated and the first of its kind *Curiosity* is a broad study of modern inquiry that explores the way forbidden topics like the occult sexuality gender and the origin of power became topics of public investigation **BOOK JACKET**

The Rutgers Art Review, 2001 **Collecting the World** James Delbourgo, 2017-07-31 Winner of the Leo Gershow Award Winner of the Louis Gottschalk Prize A Times Book of the Week A Guardian Book of the Week A wonderfully intelligent book Linda Colley A superb biography humane judicious and as passionately curious as Sloane himself Times Literary Supplement When the British Museum opened its doors in 1759 it was the first free national public museum in the world *Collecting the World* tells the story of the eccentric collector whose thirst for universal knowledge brought it into being A man of insatiable curiosity and wide ranging interests Hans Sloane assembled a collection of antiquities oddities and artifacts from around the British Empire It became the most famous cabinet of curiosities of its time With few curbs on his passion he established a network of agents to supply him with objects from China India the Caribbean and beyond Wampum beads rare manuscripts a shoe made of human skin nothing was off limits regardless of its human cost The first biography of Sloane based on his complete writings *Collecting the World* portrays one of the Enlightenment's most original and controversial luminaries Engrossing situates Sloane within the welter of intellectual and political crosscurrents that marked his times New York Times Book Review A magnificent scholarly coup and an enthralling read It conveys the excitement of original research as well as the thrill of tracking exotic curiosities to their source Sunday Times This book is a fitting tribute to Sloane's contradiction riven life *Collecting the World* is about the torment of slavery and it's about buttered muffins and about snakes shot on boats It teaches us about how we know how we organize and discipline our knowledge New Republic
