## **Possessives And Beyond Semantics And Syntax:**

**Possessives and Beyond: Semantics and Syntax** Ji-Yung Kim, Barbara H. Partee, Yury a. Lander, 2005-03 The International Workshop on the Semantics Syntax of Possessive Constructions was held at the University of Massachusetts Amherst on May 6 8 2002 This volume collects 22 of the papers presented at the workshop *Possessives and Beyond* Ji-Yung Kim, 2004 *Semantics. Volume 2* Klaus von Heusinger, Claudia Maienborn, Paul Portner, 2011-12-23 No detailed description available for SEMANTICS VON HEUSINGER ET AL BD 33 2 HSK E BOOK **Annual Workshop on Formal Approaches to Slavic Linguistics** Richard Compton, Magdalena Goledzinowska, Ulyana Savchenko, 2007 **Comparisons and Contrasts** Richard S. Kayne, 2010-08-19 Comparisons and Contrasts collects eleven of Richard Kayne's recent articles in theoretical syntax with an emphasis on comparative syntax which uses syntactic differences among languages to probe the properties of the human language faculty Kayne attaches particular importance to uncovering the primitives of syntax semantics demonstrating the existence of silent elements that are syntactically and semantically active and showing their distribution and limitations He attempts to derive the very existence of the noun verb distinction and to account for the sharp differences between nouns and verbs and for the lack of parallelism between them from the antisymmetric character of syntax The common theme is an exploration of how wide a range of questions the field of syntax can reasonably attempt to ask and then answer Comparisons and Contrasts will appeal to scholars and graduate students interested in syntax semantics and their effects on other areas of linguistics **Canonical Morphology and Syntax** Dunstan Brown, Marina Chumakina, Greville G. Corbett, 2013 This is the first book to present Canonical Typology a framework for comparing constructions and categories across languages The canonical method takes the criteria used to define particular categories or phenomena eg negation finiteness possession to create a multidimensional space in which language specific instances can be placed In this way the issue of fit becomes a matter of greater or lesser proximity to a canonical ideal Drawing on the expertise of world class scholars in the field the book addresses the issue of cross linguistic comparability illustrates the range of areas from morphosyntactic features to reported speech to which linguists are currently applying this methodology and explores to what degree the approach succeeds in discovering the elusive canon of linguistic phenomena **Semantics - Noun Phrases and Verb Phrases** Paul Portner, Klaus Heusinger, Claudia Maienborn, 2019-02-19 Gain a deeper understanding of essential research on the semantics of noun phrases and verb phrases Clear explanations of significant recent research bring complex issues to life with expert guidance on topics of debate within the field The book gives readers valuable insights into topics such as definiteness specificity genericity aspect aktionsart and mood It also discusses directions for future research Written by a world class team of authors these highly cited articles are here in paperback for the first time since their original publication An essential reference for researchers in the area *Natural Language Processing and Information Systems* Andrés Montoyo, Rafael Munoz, Elisabeth Métais, 2005-06-01 NLDB 2005 the 10th International

Conference on Applications of Natural Language to Information Systems was held on June 15-17 2005 at the University of Alicante Spain Since the first NLDB conference in 1995 the main goal has been to provide a forum to discuss and disseminate research on the integration of natural language resources in information system engineering The development and convergence of computing telecommunications and information systems has already led to a revolution in the way that we work communicate with each other buy goods and use services and even in the way that we entertain and educate ourselves The revolution continues and one of its results is that large volumes of information will increasingly be held in a form which is more natural for users than the data presentation formats typical of computer systems of the past Natural language processing NLP is crucial in solving these problems and language technologies will make an indispensable contribution to the success of information systems We hope that NLDB 2005 was a modest contribution to this goal NLDB 2005 contributed to advancing the goals and the high international standing of these conferences largely due to its Program Committee composed of renowned researchers in the field of natural language processing and information system engineering Papers were reviewed by three reviewers from the Program Committee This clearly contributed to the significant number of papers submitted 95 Twenty nine were accepted as regular papers while 18 were accepted as short papers

*How Categorical are Categories?* Joanna Blaszczak, Dorota Klimek-Jankowska, Krzysztof Migdalski, 2015-08-17 This book addresses the foundational question of category distinctions and challenges the traditional views from the modern theoretical and experimental perspective Its focus is on the noun verb noun adjective distinctions and categories occupying the grey zone between standard categories e.g. nominalizations This book will be of interest for researchers and students of linguistics and cognitive sciences

**Meaning, Frames, and Conceptual Representation** Thomas Gamerschlag, Doris Gerland, Rainer Osswald, Wiebke Petersen, 2015-06-19 The articles in this volume present contemporary and original research on linguistic meaning concept formation and conceptual analysis A central theme across the articles is the question of how concepts are structured how they are represented in the mind and how they are expressed in language Two introductory papers on concept types and frames set out the crucial role of attributes and frames for the representation of concepts The topics of the contributions range from the interrelation between determination and reference of nominal expressions the verbal and adjectival expression of attributes and the analysis of metonymy to the frame based representation of action related concepts and the classification of mental disorders in psychiatry The collection of articles provided by this volume will be of interest to researchers and advanced students in the fields of semantics pragmatics philosophy of mind and the cognitive sciences

**Articles in the World's Languages** Laura Becker, 2021-09-20 This study provides a systematic overview of articles and article systems in the world's languages using a sample of 104 languages Articles can be classified into 10 types according to their referential functions definite anaphoric weak definite recognitional indefinite presentational exclusive specific nonspecific inclusive specific and referential articles All 10 types are described in detail with examples from various

languages of the world The book also addresses crosslinguistic trends concerning the distribution and the development of different article types and it proposes a typology of article systems The aim of this study is to provide a general crosslinguistic overview concerning the attested properties and distributions of articles It is geared towards readers with interests in language typology and the nominal domain and it can serve as a point of reference for language specific studies of articles or determiners

*Frames and Concept Types* Thomas Gamerschlag, Doris Gerland, Rainer Osswald, Wiebke Petersen, 2013-11-26 This volume showcases the potential richness of frame representations The presentation includes introductory articles on the application of frames to linguistics and philosophy of science offering readers the tools to conduct the interdisciplinary investigation of concepts that frames allow Introductory articles on the application of frames to linguistics and philosophy of science Frame analysis of changes in scientific concepts Event frames and lexical decomposition Properties frame attributes and adjectives Frames in concept composition Nominal concept types and determination This volume deals with frame representations and their relations to concept types in linguistics and philosophy of science It aims at reviving concepts and frames as a common model across disciplines for representing semantic and conceptual knowledge Departing from the general assumption that frames are not just an arbitrary format of representation but essential to human cognition a number of case studies apply frames as an analytical tool to a wide range of phenomena from changes in scientific concepts to particular linguistic phenomena This provides new insights into long standing semantic issues such as the lexical representation of verbs as predicative frames specifying particular event descriptions or situation types and their participants adjectives and nominals as concept frames which provide attributes and properties of an entity as well as modification complementation possessive constructions compounding nominal concept types determination or definiteness marking Bert Gehrke Pompeu Fabra University Barcelona Spain

**Categoriality in Language Change** Lauren Fonteyn, 2019-03-25 This book presents the first serious attempt to set out a functional semantic definition of diachronic transcategorial shift between the major classes noun nominal and verb clause In English speakers have different options to refer to an event ranging from that clauses That he had guessed her size over infinitives For him to guess her size and verbal gerunds Him guessing her size to nominal gerunds His guessing of her size and deverbal nouns His guess of her size Interestingly not only do these strategies each resemble prototypical nominals to varying extents but also some of these strategies increasingly resemble clauses and decreasingly resemble prototypical nominals over time as if they are gradually shifting categories Thus far the literature that has dealt with such cases of diachronic categorial shift has mainly described the processes by focusing on form leaving us with a clear picture of what and how changes have occurred Yet the question of why these formal changes have occurred is still shrouded in mystery In this book Lauren Fonteyn tackles this mystery by showing that the diachronic processes of nominalization and verbalization can also involve functional semantic changes in two steps First building on functionalist and cognitive models of grammar she offers a theoretical model of categoriality that

allows us to study diachronic nominalization and verbalization not just as morphosyntactic but also as functional semantic processes Second she offers more concrete workable definitions of the abstract functional semantic properties of the nominal and verbal clausal class which are subsequently applied to one of the most intriguing deverbal nominalization systems in the history of English the English gerund

**Quantification** Lisa Matthewson, 2008 This volume presents articles by formal linguists on quantification in relatively understudied languages The ten contributions provide analysis of quantificational phenomena in languages from nine different families Eskimo Aleut Algonquian Na Dene Austronesian Basque Quechua Otomanguean Bantu and Chadic Approximately half of the papers present systematic overviews of quantificational phenomena in the respective languages the remainder of the papers present theoretical analyses of specific quantificational constructions The cross linguistic focus of this volume enables standard theories of quantification to be challenged by languages other than those for which they were originally designed The volume as a whole also uncovers a number of cross linguistically common properties in the realm of quantification The research presented here forms part of a growing trend towards formal study of understudied languages This is a process which will ultimately lead us to a greatly enriched understanding of the universal human language faculty The authors are all experts on their respective languages most with many years field experience All the authors have theoretical expertise in the area of quantification This book will be of interest to semanticists and syntacticians working on quantification to specialists in the languages discussed and to semantic and syntactic fieldworkers This volume presents articles on quantification in relatively understudied languages The authors are all experts on their respective languages
