Post Theory New Directions In Criticism:

Post-theory Martin McQuillan, 1999 The first part of this work addresses the current state of critical theory and questions the post-ness of the epistemological space after the event of theory as an institutional practice The second part contains examples of the type of work theory has made possible demonstrating the new directions opening up both within theory itself and in cross disciplinary study as a result of theory In this sense post can be understood to be in dialogue with issues relating to postmodernism post Marxism and post feminism

Discipline and Practice Stefan Herbrechter, Ivan Callus, 2004 Has theory become resistible Has it betrayed its promise and sold out on its practice Should theory after having become a discipline still lay claims on the radical or should it embrace its establishment within the university What future's could theory have if there is disagreement about its present's and its past's and what and how should it from now proceed to read

After Poststructuralism Colin Davis, 2004 After Poststructuralism is an accessible account of the past and present fortunes of theory suitable for anyone researching teaching or studying in the field However it offers much more than this by tracing the real contribution of poststructuralist thought to core philosophical and critical issues Most importantly Colin Davis's study offers a way forward for the humanities a way forward in which theory will play a crucial part BOOK JACKET

French Thought and Literary Theory in the UK Irving Goh, 2019-10-21 This collection presents a sort of counter history or counter genealogy of the globalization of French thought from the point of view of scholars working in the UK While the dominating discourse would attribute the US as the source of that globalization particularly through the 1966 conference on the Languages of Criticism and the Sciences of Man at Johns Hopkins University this volume of essays serves as a reminder that the UK has also been a principal motor of that globalization The essays take into account how French thought and literary theory have institutionally taken shape in the UK from the 70s to today highlight aspects of French thought that have been of particular pertinence or importance for scholars there and outline how researchers in the UK today are bringing French thought further in terms of teaching and research in this twenty first century In short this volume traces how the country has been behind the reception and development of French thought in Anglophone worlds from the late 70s to the present

Procedures of Resistance Davor Beganović, Zrinka Božić, Andrea Milanko, Ivana Perica, 2024-03-14 This volume explores the state of literary theory today decades after the repeatedly proclaimed end of theory It builds on the idea that theory is historically constituted as it is always becoming something else as Leslie Fiedler claimed in the 1950s arguing that the historical constitution of theory relies on theory's procedural nature In order to assess theory's procedural challenge to the fundamental notions that all the disciplines within an episteme have brought to the fore it addresses these questions What are the procedures theory has relied on Are they a secret to its resistance or is resistance its primary procedure And if so a resistance to what Secondly if resistance were theory's principal vehicle at which point does resistance conceptualized only procedurally as resisting something questioning anything criticizing whatever display hallmarks of a

disciplinary closure that must call for new resistances and perhaps for a fundamentally another kind. The book turns to what theory does in order to avoid a partial answer to what theory is.

The Bible in Theory Stephen D. Moore, 2010. The sixteen essays assembled in this volume, four of them co-authored, chart the successive phases of a professional life lived in the interstices of Bible and theory. Engaging such texts as the Song of Songs, 4 Maccabees, Mark, Luke, Acts, John, and Romans, and such themes as the quest for the historical Jesus, the essays simultaneously traverse postmodernism, deconstruction, New Historicism, autobiographical criticism, cultural studies, postcolonial studies, masculinity studies, queer theory, and posttheory. Individual essay introductions and periodic annotated bibliographies make the volume an advanced introduction to biblical literary criticism. From publisher's description.

Literary Theory Clare Connors, 2010-05-01. Rescuing the subject from dead, dry theorists and isms, Clare Connors focuses on the real questions that emerge when we read and study literature, such as how we find meaning and how literature relates to its historical context, before exploring the response of theorists. Using selections from works including poetry by Christina Rossetti and Annie Proulx's *Brokeback Mountain*, Connors unites theory with practice, revealing how enjoyable it is to think about reading.

Interdisciplinarity Joe Moran, 2010-02-25. Interdisciplinarity covers one of the most important changes in attitude and methodology in the history of the university. Taking the study of English as its main example, this fully updated second edition examines the ways in which we have organized knowledge into disciplines and are now reorganizing it into new configurations as existing structures come to seem restrictive. Joe Moran traces the history and use of the term interdisciplinarity, tackling such vital topics as the rise of the disciplines, interdisciplinary English, Literary and Cultural Studies, theory, and the disciplines' texts and histories, literature and science, space and nature. Including an updated further reading section and a new concluding chapter, *Interdisciplinarity* is the ideal entry point into one of today's most heated critical debates.

Style in Theory Ivan Callus, James Corby, Gloria Lauri-Lucente, 2012-12-06. What in theory is style? How has style been rethought in literary theory? Drawing together leading academics working within and across the disciplines of English, philosophy, literary theory, and comparative literature, *Style in Theory: Between Philosophy and Literature* sets out to rethink the important but all too often overlooked issue of style, exploring in particular how the theoretical humanities open conceptual spaces that afford and encourage reflection on the nature of style, the ways in which style is experienced, and how style allows disciplinary boundaries to be both drawn and transgressed. Offering incisive reflections on style from a diverse and contemporary range of theoretical and methodological perspectives, the essays contained in this volume critically revisit and challenge accepted accounts of style and provide fresh and compelling readings of the relevance in any rethinking of style of specific works by the likes of Shakespeare, Petrarch, Kant, Nietzsche, Heidegger, Deleuze, Blanchot, Derrida, Nancy, Cixous, and Meillassoux.

The Social Imperative Paula L. Moya, 2015-12-23. In the context of the ongoing crisis in literary criticism, *The Social Imperative* reminds us that while literature will never by itself change the world, it remains a powerful tool and important actor in the ongoing struggle to

imagine better ways to be human and free Figuring the relationship between reader and text as a type of friendship the book elaborates the social psychological concept of schema to show that our multiple social contexts affect what we perceive and how we feel when we read Championing and modeling a kind of close reading that attends to how literature reflects promotes and contests pervasive sociocultural ideas about race ethnicity gender and sexuality Paula M L Moya demonstrates the power of works of literature by writers such as Junot Diaz Toni Morrison and Helena Maria Viramontes to alter perceptions and reshape cultural imaginaries Insofar as literary fiction is a unique form of engagement with weighty social problems it matters not only which specific works of literature we read and teach but also how we read them and with whom This is what constitutes the social imperative of literature

Postcomposition Sidney I Dobrin, 2011-06-02 Leading a burgeoning self critical moment in composition studies and writing program administration Postcomposition is a fundamental reconsideration of the field that attempts to shift the focus away from pedagogy and writing subjects and toward writing itself In this forceful and reasoned critique of many of the primary tenets and widely accepted institutional structures of composition studies Sidney I Dobrin delivers a series of shocks to the system meant to disrupt the pedagogical imperative and move beyond the existing limits of the discipline Dobrin evaluates the current state of composition studies underscoring the difference between composition and writing and arguing that the field's focus on the administration of writing students and its historically imposed prohibition on theory greatly limit what can be understood about writing Instead he envisions a more significant approach to writing one that questions the field's conservative allegiance to subject and administration and reconsiders writing as spatial and ecological Using concepts from ecocomposition spatial theory network theory complexity theory and systems theory Postcomposition lays the groundwork for a networked theory of writing and advocates the abandonment of administration as a useful part of the field He also challenges the usefulness of rhetoric in writing studies showing how writing exceeds rhetoric Postcomposition is a detailed consideration of how posthumanism affects the field's understanding of subjectivity It also tears at the seams of the contingent labor problem As he articulates his own frustrations with the conservatism of composition studies and builds on previous critiques of the discipline Dobrin stages a courageous and inevitably polemical intellectual challenge to the entrenched ideas and assumptions that have defined composition studies
