and Strategic Policy Alison Bailey,1986 Feminist Politics Deborah Orr,2007 The essays in Feminist Politics contest some of the prevailing conceptualizations of identity and difference as well as the functions of these concepts in feminist political discourse and praxis Doing so they amply demonstrate that issues of identity and difference have a central place in contemporary feminist scholarship The authors of these essays have worked to develop new ways of understanding and living

out differences which will both preserve and celebrate them while also fostering the necessary conditions for opening dialogue and forming new coalitions The intent of these efforts has been to thereby engender imaginative new strategies for the personal spiritual and sociopolitical changes that will enable human growth wellbeing and flourishing While the focus of the work represented here is understandably on women the issues that are raised are given additional urgency explicitly in some of the papers and implicitly in others by the situation of their concerns in the context of the world created by the Bush administration Because that administration has foregrounded issues of identity and difference in ways that are not only inhumane and often inaccurate but dangerous for all of us the new ways of thinking and acting that are proposed here have a much broader application Thus these papers truly invite not only feminists but all people to move in new directions Taken as a whole this volume represents cutting edge thinking from an international perspective in these important and pressing areas for feminist research and praxis

After The Cold War Charles Kegley, 2021-11-28 This is a text on the traditional questions of nuclear deterrence and the unconventional answers suggested by the emerging new world order These widely ranging essays by scholars policymakers and moral philosophers present rival ideas about the morality of alternative means for preserving mutual security as the world moves beyond the Cold War

Decentering the Center Uma Narayan, Sandra Harding, Sandra G. Harding, 2000-03-22 The essays in this volume bring to their focuses on philosophical issues the new angles of vision created by the multicultural global and postcolonial feminisms that have been developing around us These multicultural global and postcolonial feminist concerns transform mainstream notions of experience human rights the origins of philosophic issues philosophic uses of metaphors of the family white antiracism human progress scientific progress modernity the unity of scientific method the desirability of universal knowledge claims and other ideas central to philosophy

Feminists Doing Ethics Peggy DesAutels, Joanne Waugh, 2001-09-10 Feminists Doing Ethics is the debut title in the new Rowman Littlefield series Feminist Constructions In this thoughtful collection contributors refashion essays from the international conference on feminist ethics Feminist Ethics Revisited October 1999 with an aim to critique social practice and develop an ethics of universal justice The essays in this exciting volume explore the intricacies and impact of reasoned moral action the virtues of character and the empowering responsibility that morality generates Feminists Doing Ethics brings to light concepts and ideas that are intended to extend our understanding of morality and of ourselves

Whiteness Chris J. Cuomo, Kim Q. Hall, 1999 Written in an engaging narrative style these philosophical investigations undermine racist hierarchies along with false naturalistic conceptions of the

meanings of race and universalistic understandings of gender by considering whiteness as it shapes and is infused by gender class sexuality and culture Central to this project are questions about how it is that culture and the state create such a wide range of different people who understand themselves as white The essays collected here discuss how one learns to be a good white Southern woman what it means to pass as white and whether there really is a dilemma that accompanies white privilege

Clausewitz and Modern Strategy Michael I. Handel,1986 Clausewitz and Modern Strategy is the first ever volume devoted to the influence and interpretation of Clausewitz On War to be published in the English language Among all the better known works on military theory in Western civilization it is Carl von Clausewitz magnum opus that has been able to withstand every kind of political social economic and technological change since it first appeared in 1832 and will always remain of more than purely historical interest This collection of essays first presented at an international conference on Clausewitz at the US Army War College in April 1985 spans every possible aspect of Clausewitz influence It is grouped into three parts The first addresses the issue of whether an early nineteenth century book on war is still pertinent today in an era when war more than any other human activity has been revolutionized by modern technology In the second part analyses are made of selected theoretical concepts and other specific subjects discussed by Clausewitz ranging from chance and uncertainty space and time and intelligence in war to guerrilla warfare The final part takes a critical look at Clausewitz influence on the development of strategic doctrines in several European countries as well as the degree to which his theories were not only understood but misunderstood by various military thinkers In many instances Clausewitz readers interpreted his ideas out of context and selectively employed his theories to match their own preconceived notions Like many other works on political theory and philosophy On War is not always easy to read and understand Clausewitz and Modern Strategy provides an excellent introduction to the complex world of Clausewitzian thought offering a better overall understanding of Clausewitz key concepts his system of thinking and his influence on the study of modern war It is indispensable reading for all students military historians strategic analysts and thinkers
